OUTLOOK AND STRATEGY

Market Review. The Bangko Sentral ng Pilipinas (BSP) has lowered policy rates by 25 basis points to 6.25% last August. Two more 25 basis point rate cuts are expected for the rest of the year. The BSP lowered its inflation outlook for 2024 from 3.3% to 3.1%. The deceleration in inflation is led by lower food and oil prices. Moreover, the BSP also announced a 250 basis point reduction in the reserve requirement ratio (RRR) of banks, effective on October 25. The Bureau of the Treasury released its fourth quarter auction schedule which featured reduced auction frequency and volume. There will only be six auctions of PHP 15 billion each in the fourth quarter. Overall, the favorable fundamental and technical backdrop translated to strong market sentiment pushing local government bond yields sharply lower across the curve. The BVAL yield of the 5-year local government bond decreased by 86 basis points over the third quarter, ending at 5.57%.

The fund's duration of 2.70 as of end September continues to track the duration of its benchmark.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

CONFLICTS OF INTEREST

The customized benchmark is managed by SLIMTC which can result to conflict of interest. Inaccuracies or errors in the computation of the benchmark can show that the fund is performing better than it actually is.

To manage conflict of interest, SLIMTC implements an independent computation and validation process. Computation of benchmark figures is conducted by Portfolio Risk and Analytics, a team that is independent from the Portfolio Manager. Periodic quality assurance review is also conducted by another team that is independent to both Portfolio Management and Portfolio Risk and Analytics to validate correctness of the inputs and computations.
