## Key Information and Investment Disclosure Statement

### Sun Life Investment Management (SLIMTC) PHP Medium-Term Multi-Class Fixed Income Bond Fund As of Quarter Ended of 31 March 2026

**Tax Risk:** Clients are advised to consult with their own professional advisers of the exact tax implications, appropriate tax rates, and any changes in tax laws or practice in its own jurisdiction.

**Other Risks:** In case where past performance of a fixed income, equity or global fund instrument is being used to illustrate possible return, please be aware that past performance is not necessarily indicative of future performance. Complex products such as derivatives are not suitable for all clients and are intended for experienced and sophisticated clients.

The Fund employs a risk management policy based on modified duration. Modified duration measures the sensitivity of bond prices to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more the NAVPU will fluctuate in relation to changes in interest rates. All the Fund's investment outlets undergo evaluation in accordance with the Trustee's Investment Policy Manual. Regulatory exposure limits are monitored on a regular basis. The Fund may also use financial derivative instruments solely for the purpose of hedging risk exposures.

### OTHER DISCLOSURES

#### OUTLOOK AND STRATEGY

##### Market Review.

Bangko Sentral ng Pilipinas (BSP) lowered its key rate to 4.25% on February 2026 amid softer-than-expected 4Q25 GDP and inflation within its 2-4% target range.. On February 28 2026, US and Israel initiated coordinated strikes against Iran, which led to a spike in oil prices across the globe. With Middle East oil accounting for over 95% of Philippine oil imports, concerns over inflation drove PHP government bond yields sharply higher as market liquidity deteriorated. Amid the bond market turmoil, BSP initiated Open Market Operations (OMO) to support bond market liquidity. The BSP also signaled a reluctance to hike interest rates by shifting its focus towards core inflation, which strips out volatile food and energy prices. Yields are higher by as much as 60-90bp quarter-over-quarter.

Looking ahead, PHP government bond yields are expected to fall towards pre-war levels with the war in the Middle East expected to reach a resolution. Furthermore, softer local demand is expected to limit the inflation pass-through of higher oil prices to core CPI, which will allow the BSP to keep policy rates unchanged.

The fund's duration stood at 2.48 as of end March.

#### INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may invest in deposits in other banks, securities issued or guaranteed by the Philippine Government or the BSP, tradable securities issued by any supranational entity and exchange-listed fixed income securities. Subject to BSP guidelines and the Trustee's Trust Committee approval, the Fund may also avail of financial derivative instruments solely for the purpose of hedging risk exposures, as well as invest in other tradable investment outlets/categories as may be deemed suitable for the Fund.

#### CUSTOMIZED BENCHMARKS

The Bloomberg Philippine Sovereign Bond Index 1 to 5 Year is a rules-based market-value weighted index created to measure the shorter-term (1-5 years) fixed-rate local currency securities publicly issued by the Philippines, including retail securities. Minimum par amount for inclusion in the index is PHP 3 Bn.
