### OTHER DISCLOSURES

#### OUTLOOK AND STRATEGY

##### Market Review.

U.S. CPI throughout the quarter remained benign. This prompted the U.S. Federal Reserve (Fed) to cut rates by 25 basis points in its September meeting citing weakness in the jobs market. This is the first cut for the year, and the market is expecting two further cuts in 2025. Money market yields are expected to fall from current levels as policymakers seem inclined to ease, though there is significant dispersion in their individual expectations on the pace and magnitude of the succeeding rate cuts.

The Fund will maintain the strategy of deploying inflows to various target funds.

#### INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may invest in deposits in other banks, securities issued or guaranteed by the Philippine Government or the BSP, tradable securities issued by any supranational entity and exchange-listed fixed income securities. Subject to BSP guidelines and the Trustee's Trust Committee approval, the Fund may also avail of financial derivative instruments solely for the purpose of hedging risk exposures, as well as invest in other tradable investment outlets/categories as may be deemed suitable for the Fund.
