Market Review and Outlook

- Selling pressure increased in June as increasing inflationary concerns, steep depreciation of the Peso, and slowing global growth prospects sapped investor sentiment. The PSEi hit bear territory as foreign selling persisted, ending the month at 6,155.43 which is 9.14% lower month-on-month.
- On the macro front, the Bangko Sentral ng Pilipinas (BSP) raised its policy rate to 2.50% (25 basis points increase). In addition, despite previous statements hinting gradual rate hikes, BSP Governor Medalla stated that they are now open to bigger rate hikes "if we see that the exchange rate is overshooting too much". Inflation continued to accelerate, hitting 5.4% in May causing the BSP to lift its average inflation rate to 5% (from 4.6% previous) for 2022.
- Local yields climbed led by the front-end on BSP tightening outlook amid accelerating inflation. Bureau of Treasury (BTR) awarded auction bids with significant yield concession as market appetite was still lacking amid the unfavorable inflation and policy outlook.
- Looking ahead, we remain positive on Philippine equities due to the continued reopening story and a sound incoming economic team. We do remain cautious given heightened inflationary risks, weak peso, and continued risk-off sentiment brought about by global macroeconomic concerns.
