What does the Fund invest in?

The **Sun Life Prosperity Philippine Stock Index Fund** aims to generate long-term capital growth by tracking the performance of the Philippine Stock Exchange Index (PSEi). The Fund invests primarily in common stocks that comprise the PSEi and in cash and other money market instruments.

The Fund is suitable for investors with an **aggressive risk profile** and a long-term investment horizon. This is for investors who are willing to take risks for higher returns.

How has the Fund performed?

Note: Year-to-date (YTD) returns are computed as the return from the last business day of the previous year to the last business day of the reporting month.

Market Review and Outlook

- Selling pressure increased in June as increasing inflationary concerns, steep depreciation of the Peso, and slowing global growth prospects sapped investor sentiment. The PSEi hit bear territory as foreign selling persisted, ending the month at 6,155.43 which is 9.14% lower month-on-month.
- On the macro front, the Bangko Sentral ng Pilipinas (BSP) raised its policy rate to 2.50% (25 basis points increase). In addition, despite previous statements hinting gradual rate hikes, BSP Governor Medalla stated that they are now open to bigger rate hikes "if we see that the exchange rate is overshooting too much". Inflation continued to accelerate, hitting 5.4% in May causing the BSP to lift its average inflation rate to 5% (from 4.6% previous) for 2022.
- Looking ahead, we remain positive on Philippine equities due to the continued reopening story and a sound incoming economic team. We do remain cautious given heightened inflationary risks, weak peso, and continued risk-off sentiment brought about by global macroeconomic concerns.
