Market Review

- The Philippines Stock Exchange Index (PSEi) had its third consecutive month of positive returns, posting a gain of +3.04% in January.
- Philippine GDP for the fourth quarter of 2023 came in at 5.6% which exceeded the consensus estimate of 5.2%.
- Inflation finally fell within the Bangko Sentral ng Pilipinas' (BSP) preferred range as it came in at 3.9% for December 2023. It is expected to continue declining in 2024, with the BSP forecasting that it will land between 2.8% and 3.6%.
- Foreign funds were net buyers of Philippine equities in January with bank stocks receiving most of the inflows.
- The Philippine equity market has been testing the 6,700 resistance level in recent weeks. A successful break will likely bring up the PSEi's trading range to the 6,700 to 7,000 area.
