Market Review

- Selling pressure increased in June as increasing inflationary concerns, a steep depreciation of the Peso, and slowing global growth prospects sapped investor sentiment. The PSEi hit bear territory as foreign selling persisted to end the month at 6,155.43, -9.14% lower month-on-month.
- On the macro front, the BSP raised its policy rate by 25bps to 2.50%. In addition, despite previous statements hinting at gradual rate hikes, BSP Gov. Medalla stated that they are now more open to bigger rate hikes as inflation continued to accelerate, hitting 5.4% in May causing the BSP to lift its average inflation rate to 5% (from 4.6% previous) for 2022.
- Looking ahead, while we remain positive on Philippine equities due to the continued reopening story and a sound incoming economic team, we do remain cautious given heightened inflationary risks, a weak Peso, and continued risk-off sentiment brought about by global macroeconomic concerns.
