Market Review

- The Philippine Stock Exchange Index (PSEi) broke its four-month winning streak, posting a slight loss in March (-0.45%).
- Foreign fund flows reversed during the month as US\$45 million worth of net outflows, largely due to the FTSE rebalancing, were recorded.
- Meanwhile, local inflation accelerated in February to 3.4% y/y. The print came in above consensus estimates and was close to the higher end of the Bangko Sentral ng Pilipinas' forecasted range of 2.8% to 3.6%
- Amidst the uptick in inflation, the BSP signaled that rates cuts in the first half of 2024 would be too soon and it is likely to follow the U.S. Federal Reserve's lead before acting.
- The PSEi tested, but ultimately failed, to break past the 7,000 level. A strong support level remains at 6,800 and the PSEi is likely to stay within a tight trading range in the coming months given the absence of major catalysts.
