Market Review

- The Philippine Stock Exchange Index (PSEI) trended lower and hit key support levels during the month, although strong buying appetite in late June led to a month-on-month change of just -0.3%.
- Meanwhile in the fixed income market, bond yields dropped by 2 to 10 basis points (bps; 0.02-0.10%) in June, leading to positive total returns for investors.
- Headline inflation came in higher last May at 3.9% y/y versus April's 3.8% y/y. However, the print was below estimates and at the lower end of the 3.7% y/y to 4.5% y/y forecast of the Bangko Sentral ng Pilipinas.
- Despite this, the BSP kept its policy rate steady during its June meeting though their post meeting communication took a more dovish stance.
- With a lack of strong catalysts expected in July, the PSEI may continue to trade between its support of 6,150 and resistance of 6,500. Local government bond yields, on the other hand, will likely move lower for as long as inflation remains within BSP expectations.
