## Market Review

- Geopolitical tensions between US-Iran pushed the PSEI below 6,000 in March—down 10% for the month.
- In fixed income, Peso government bond yields rose 0.45-1.16% across the yield curve. Overall, Peso fixed income returns were negative for the month.
- Inflation was the main cause of negative returns after oil climbed past \$100 per barrel. The Philippines remains very vulnerable to high oil prices, with March inflation already clocking in at 4.1%.
- The peso weakened further, breaking the P60 level to \$1. Foreign outflows dragged the PSEI with the Peso falling 5.1% in March.
- For Peso equities, we see the PSEI hovering around the 5,800 and 6,200 area. The direction of the PSEI would be dependent if the conflict drags on or is abruptly resolved.
- We also expect to see continued volatility in fixed income as inflation could remain sticky, oil prices elevated and the probability of interest rate hikes from BSP increase.
