## Market Review

- The Philippines Stock Exchange Index (PSEi) had its third consecutive month of positive returns, posting a gain of +3.04% in January. On the other hand, local bonds snapped a two-month streak of positive returns as yields trended higher over January.
- Inflation finally fell within the Bangko Sentral ng Pilipinas' (BSP) preferred range as it came in at 3.9% for December 2023.
- Foreign funds were net buyers of Philippine equities in January with bank stocks receiving most of the inflows.
- The rise in Philippine bond yields was partially due to the market's anticipation of a supply influx as it is likely that the Bureau of the Treasury (BTr) will issue a Retail Treasury Bond (RTB) in this first quarter of 2024.
- The Philippine equity market has been testing the 6,700 resistance in recent weeks and a successful break will likely bring up its trading range to the 6,700 to 7,000 level. Meanwhile, local yields are expected to move lower as the BSP is expected to begin cutting rates within this year.
