The meeting host chose the three most-asked questions from the stockholders and started with the question on what is Sun Life doing to work more efficiently, serve clients better, and stay ahead in the market, considering the importance of digital tools. Valerie N. Pama, President of the SLP Funds, answered the question stating that Sun Life is leveraging technology, data analytics, and automation to streamline operations, reduce costs, and deliver faster, more personalized services. She mentioned that the introduction of new payment channels, like GCash and BPI, has made transactions more convenient for clients. She also highlighted that BPI's fully digitalized electronic auto-debit arrangement for auto-invest services now also covers the Sun Life Prosperity World Income Fund, Inc.

The host brought up the second question related to how Sun Life is improving its support and handling of client concerns. Mr. Gerald L. Bautista, President of Sun Life Asset Management Company, Inc. replied that the Company is strengthening and improving its response time and implementing regular client feedback to address needs proactively. The Company has also enhanced its consumer protection via the Financial Consumer Protection Act (FCPA) Project which strengthened the investor suitability assessment process to align Company recommendations with client financial goals, ensuring faster, more personalized, and consistent service across all touchpoints.

Finally, the question on how the Funds managed its operations last year, and how it intend to perform better given market changes and shifting customer habits was answered by Ms. Candy S. Esteban, Treasurer of the Funds. She said that last year's performance was driven by effective cost management and strong product mix. To sustain and improve results, the Company will focus on strengthening digital platforms, client relationships, and remain agile in adjusting strategies to market conditions. The FCPA project, along with the introduction of new payment channels, like Gcash and BPI, are among the initiatives implemented to further strengthen our relationship with valued customers.

MANAGEMENT REPORT

- a. Management's Discussion and Analysis (MD&A) or Plan of Operation.

CORPORATE INFORMATION

Sun Life Prosperity Philippine Stock Index Fund, Inc. (the "Company") was incorporated and registered with the Philippine Securities and Exchange Commission (SEC) on December 23, 2014. The Company is a registered open-end investment company under the Investment Company Act (Republic Act "R.A." No. 2629) and the Securities Regulation Code (R.A. No. 8799), formerly known as the Revised Securities Act (B.P. No. 178). The Company's investment objective is to generate long-term capital growth by tracking the performance of the Philippine Stock Exchange Index (PSEi). The investment policy is to invest primarily in common stocks that comprise the PSEi and in cash and/or money market instruments. As an open-end investment company, its shares are redeemable anytime based on the Net Asset Value Per Share (NAVPS) at the time of redemption.

1. Plan of Operation. For the next twelve (12) months, management will continue its current plan of operation, with a focus on improving cost efficiency.
2. Management's Discussion and Analysis. The performance of the Company could be measured by the following indicators:
 - 2.1 Increase / Decrease in Net Assets Value Per Share (NAVPS) NAVPS is computed by dividing net assets (total assets less total liabilities) by the total number of shares issued and outstanding plus the total number of shares outstanding due to deposit for future subscriptions (DFFS) and for conversion to shares, if any, as of the end of the reporting day. Any increase or decrease in NAVPS translates to a prospective capital gain or capital loss, respectively, for the Company's shareholders.
 - 2.2 Net Investment Income. Represents the total earnings of the Company from its investment securities, less operating expenses and income tax. This gauges how efficiently the Company has utilized its resources in a given time period.
 - 2.3 Assets Under Management (AUM). The assets under the Company's disposal. This measures the profitability of the Company (increase / decrease brought about by its operational income) as well as investor confidence (increase / decrease brought about by investor subscriptions / redemptions).
 - 2.4 Cash Flow. Determines whether the Company was able to achieve the optimal level of liquidity by being able to meet all its scheduled payments while at the same time maintaining the maximum level of investments and minimum level of cash.

Top 5 Key Performance Indicators

The performance of a fund is important to its investors. Oftentimes, it is used when making investment decisions. That is why Key Performance Indicators (KPI), a set of quantifiable measures, is necessary to gauge its performance in terms of meeting the Fund's investment objective while consistently following its investment policy. The following are the top 5 KPIs related to the Fund:

1. **Total Return.** The performance of a mutual fund is always expressed in terms of its total return, which is the sum of the change in a fund's net asset value (NAV), its dividends and its capital gains distributions over a given period of time, net of its expenses.
2. **Market Conditions.** A fund's true performance potential needs to be evaluated within the context of the market environment prevailing during the different periods used. It is most relevant to investors to measure the performance of a fund within a 5-year time frame as it will most likely cover a mix of market conditions that may be translated into a more reliable long-term indicator of the fund manager's investment management abilities.
3. **Benchmarks.** Benchmarking is one of the most important aspects of a mutual fund's total return performance. A fund's performance metrics only have meaning if they are compared to appropriate "guideposts," or benchmarks.

As for the Fund, considering that it is primarily invested in stocks listed in the Philippine Stock Exchange (PSE), its performance is measured against the Philippine Stock Exchange Index (PSEi). The PSEi is the main index of the PSE and is the most watched index among the six PSEi Series. It measures the relative changes in the free float-adjusted market capitalization of the 30 largest and most active common stocks listed at the PSE, thereby providing an overview of the market's overall condition.

The following table shows how the Company performed as of June 30, 2026 and December 31, 2025:

	Total Return vs Benchmark	
	Benchmark: 100% PSEi	Sun Life Prosperity Phil. Stock Index Fund, Inc.
5-Year Return	-5.93%	-12.53%

5. Asset Size. Open-ended mutual funds grow their asset size in two ways:
 - i. Increase in the value of the underlying assets as a result of the strong performance of equity securities and / or bonds in the fund's portfolio. When the underlying assets in a portfolio increase in value, the fund's asset size increases.
 - ii. The inflow of investors' money. This is why a fund's asset size will continue to grow even if it has a negative return.

The increase in a fund's asset size signifies solid fund management skills which, combined with favorable market conditions backed by a strong economic outlook, illustrates how effectively a fund manager has performed and the extent to which value has been added through active management.

The second indicates investor confidence in the fund manager, the Company, or both.

Most analysts check whether the performance of a mutual fund is attributable to personnel who have since left the fund. While there is no magic number when it comes to fund manager tenure, it should provide some investor comfort to know that with respect to the Fund, the Fund Manager and the Fund's top management have been with the Fund for at least five (5) years. Furthermore, SLOCPI having been in the business for decades combined with a record of consistent strong performance indicates a stability and resilience capable of withstanding the different stages of the business cycle.

- 3 Changes in and Disagreements with Accountants on Accounting and Financial Disclosure. There have been no changes in and / or any disagreement with accountants on any accounting and financial disclosures and / or on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedure.

Current state

Deposit for future subscriptions (DFFS) received in cash amounting to P4,109,576,426, P5,885,564,034, and P8,067,154,425, as at December 31, 2025, 2024 and 2023, respectively, were classified as equity since the Fund has met all of the conditions required for such recognition.

The DFFS as at December 31, 2025, 2024 and 2023 are held by the Fund's investors.

As at December 31, 2025, the Fund has 3,999,935,749 outstanding shares out of the 4,000,000,000 authorized share capital with a par value of P0.01 per share.

The Fund's common shares are available through SLAMCI's registered representatives and eligible securities dealers that have entered into an agreement with SLAMCI to sell shares.

The Fund is part of the seventeen (17) Sun Life Prosperity Funds which offer excellent value to investors as a result of SLAMCI's collective experience in fund management, strong investment philosophy, remarkable investment performance and strong organizational structure. However, it should be noted that past performance of any fund manager is no guarantee of future results. It is only an indication of their capabilities to deal with rapid changes in the economy and market conditions in the future.

The Sun Life Prosperity Funds make investing simple, accessible and affordable. The Sun Life Prosperity Funds offer a unique "family of funds" to choose from. The "family of funds" concept allows investors to modify their investment strategies over time, by letting them transfer from one fund to another, as their needs dictate, as much as ten times a year without paying documentary stamp taxes.

The financial statements have been prepared on the historical cost basis, except for certain financial assets measured at fair value. Fair value changes therefore affect the ratios related to the Fund's total comprehensive income. The change to marked-to-market thus provides equitable treatment between investors coming in and out of the Fund.

The Fund participates in the mutual funds sector which is a sub-sector of the financial services industry. There are no national geographical boundaries as the nature of the industry and prevailing technology make it possible for the various players to offer their services to almost any place in the country.

The Fund principally competes directly with other mutual funds in the Philippines and with the Unit Investment Trust Funds ("UITFs") offered by commercial banks, in terms of returns and the associated risks of the return. The Fund's market strength is its wide distribution network that provides strategic distribution of Fund shares and the financial stability and reputation of its Investment Company Adviser, SLAMCI. The Fund intends to compete principally based on the reputation of SLAMCI for superior investment performance and corporate governance coupled with its distribution network and superior backroom operations.

The Fund participates in the mutual funds sector, which is a sub-sector of the financial services industry. There are no national geographical boundaries as the nature of the industry and prevailing technology make it possible for the various players to offer their services to almost any place in the country.

There are many potential advantages to investing in mutual funds and in the Offer Shares. However, in deciding to invest, the investor is strongly advised to also consider the risks involved in investing in mutual funds, and in the Offer Shares, as well as the risks that the Fund faces, given its underlying assets whose respective values essentially affect the Fund's overall net asset value.

Equity Risk: Companies issue equities, or stocks, to help finance their operations and future growth. A company's performance outlook, market activity and the larger economic picture influence its stock price. When the economy is expanding, the outlook for many companies will be positive and the value of their stocks should rise. The opposite is also true. The value of a Fund is affected by changes in the prices of the stocks it holds. The risks and potential rewards are usually greater for small companies, start-ups, resource companies and companies in emerging markets. This risk is inherent to all equity-laced funds. However, the Index Fund may only be invested in stocks which make up the Philippine Stock Exchange Index (PSEi), limiting allocation to a fixed basket of thirty (30) common stocks of listed companies. These are carefully selected to represent the general movement of the Philippine stock market.

The selection of these companies is based on a specific set of criteria. Under the revised policy on index management, companies should meet three (3) criteria to qualify under the PSEi:

1. The company's free float level must be at least 15%.
2. The company must rank among the top 25% in terms of median daily value in nine out of the twelve-month period in review.
3. Ranking of Top 30 qualified companies based on full market capitalization.

Index Risk: The performance of the Fund may not precisely duplicate the performance of the benchmark index being used. The Fund may rebalance the portfolio to account for changes in the composition or valuation of the stocks within the index. This creates the possibility of a marked difference between the Fund's performance and that of the index. Lacking active risk management, the Fund is fully exposed to all the changes to the market benchmark, the Philippine Stock Exchange Index (PSEi). Considering that this risk is inherent to the Fund, investors must be fully aware of it prior to investing.

Market Risk: Stock prices rise and fall. The carrying value of the Fund's investments in other corporate stocks depends on the value at which the stocks have been traded at the stock market as at the end of a particular day. The risk is minimized by closely monitoring the Fund's tracking error and establishing certain exposure limits.

Fund Manager Risk: The performance of the Funds is also dependent on the Fund Manager's skills. Hence, the Fund may underperform in the market and/or in comparison with similar funds due to investment decisions made by the Fund Manager, and may also fail to meet the Fund's investment objectives. The Board of Directors of the Fund, however, shall ensure that all investment policies and restrictions enumerated in this Prospectus are strictly followed.

Liquidity Risk: The Fund is usually able to service redemptions of investors within seven (7) banking days after receipt of the notice of redemption by paying out redemptions from available cash or near cash assets in its portfolio. However, when redemptions exceed the Funds available cash or near cash assets in its portfolio, the Fund will have to sell its other security holdings; and during periods of extreme market volatility, the Fund may not be able to find a buyer for such assets. Consequently, the Fund may not be able to generate sufficient cash from its sale of assets to meet the redemptions within the normal seven (7) banking day period. To mitigate this, the Fund maintains adequate highly liquid assets in the form of cash, cash equivalents and near cash assets in its portfolio.

Dilution Risk: Being an open-end mutual fund, various investors may effectively subscribe to any amount of shares of the Fund. As such, investors face the risk of their investments being diluted by the shares of the other investors of the Fund. The influence that the investors can exert over the control and management of the Fund decreases proportionately. To mitigate the risk, the Fund may impose single investor limits to the ownership of the fund, when necessary. This limits the extent to which any single investor can exercise control of the Fund. The Fund may also impose an anti-dilution levy or fee for significant orders, to protect the interest of the remaining investors of the Fund, when necessary.

Large Transaction Risk: If an investor in a Fund makes a large transaction, the Fund's cash flow may be affected. For example, if an investor redeems a large number of shares of a Fund, that Fund may be forced to sell securities at unfavorable prices to pay for the proceeds of redemption. This unexpected sale may have a negative impact on the net asset value of the Fund. To mitigate this risk, the Fund may impose single investor limits to the ownership of the fund, when necessary. This limits the extent to which redemptions from any single investor can impact the Fund's cash flow. The Fund may also impose an anti-dilution levy or fee for significant orders, to protect the interest of the remaining investors of the Fund, when necessary.

Non-Guarantee: Unlike deposits made with banks, an investment in the Fund is neither insured nor guaranteed by the Philippine Deposit Insurance Corporation ("PDIC"). Hence, investors carry the risk of losing the value of their investment, without any guarantee in the form of insurance. Moreover, as with any investment, it is important to note that past performance of the Fund does not guarantee its future success.

Regulatory Risk: The Fund's investments and operations are subject to various regulations affecting among others, accounting of assets and taxation. These regulations occasionally change, and may result in lower returns or even losses borne by the investors. For example, a higher tax imposed on the sale or purchase of underlying assets of the Fund may result in lower net asset value of the Fund. To mitigate this risk, SLAMCI adopts global best practices. Further, it maintains regular communications with the relevant government agencies to keep itself abreast of the issues giving them concern, and to have the opportunity to help them set standards for good governance. SLAMCI also takes an active participation in the Philippine Investment Funds Association, Inc. ("PIFA"), an association of mutual fund companies in the Philippines.

Operational Risk: This is the risk of loss resulting from inadequate or failed internal processes, controls, people, and systems. Categories of operational risks may fall under: sales and distribution, human resources, information technology, processes and people, accounting and finance, model risk, legal and regulatory and third-party relationships. The Fund ensures that internal controls and practices are consistent with enterprise-wide policies supporting the management of operational risks. The Fund has established business specific guidelines. Comprehensive investment program, including appropriate levels of self-insurance, is maintained to provide protection against potential losses.

Passive Management Risk: The Fund is a passively managed fund. Passively managed funds would not sell a security if the security's issuer was in financial trouble, unless the security is removed from the applicable index being replicated. The passively managed fund must continue to invest in the securities of the index, even if the index is performing poorly. That means the passively managed fund won't be able to reduce risk by diversifying its investments into securities listed on other indices. As a result, the performance of a passively managed fund may differ significantly from the performance of an actively managed fund.

The above risk factors are by no means exhaustive. New and/or unidentified risks may arise given the fast changing financial markets and economic environment.

Classification of the Fund into high, moderate or low risk investment: The Fund will predominantly be exposed to equity securities, comprising the Philippine Stock Exchange Index (PSEi) in its portfolio, and typically are high-risk investments. However, the Fund will be passively-managed, which means that the portfolio endeavors to replicate the components and the performance of the benchmark index. Furthermore, a minimal portion will be maintained in cash and cash equivalents for liquidity purposes. The Fund is for retail and corporate investors, and is classified as an aggressive investment.

Item 2. Properties

The Fund has financial assets in the form of cash and cash equivalents and listed equity securities only. As prescribed by SEC Rules, all of its assets are held by its custodian bank, Citibank, N.A..

Office space of the Fund is provided by SLAMCI pursuant to the Management Agreement between them. The Fund does not intend to acquire any real property in the course of its business.

On 14 September 2016, SEC *en banc* approved the confidential treatment of the list of Top 20 shareholders of the Fund, including its 5% and 10% beneficial owners. This is to protect the investors' privacy, which is a privilege they enjoy when they invest in other shared investment vehicles, such as unit investment trust funds, and when they invest in bank deposits.

The following table shows the number of institutional and retail investors and the percentage of their investments, and the geographic concentration of investments as of December 31, 2025.

3. Dividends

The Fund has not declared cash or stock dividends to date, but it has no restrictions that may limit its ability to pay dividends in the future.

The Board of Directors of the Fund has the power to fix and determine the amount to be reserved or provided for declaration and payment of dividends from the Fund's unrestricted retained earnings. The amount of such dividends (either in cash, stock, property or a combination of the foregoing) will depend on the Fund's profits, cash flows, capital expenditure, financial condition, and will follow SEC's guidelines on determining retained earnings available for dividend declaration. The existence of surplus profit arising from the operation of the Fund is needed before a dividend can be declared. The surplus profits or income must be a bona fide income founded upon actual earnings or profits. Actual earnings or profits shall be the net income for the year based on the audited financial statements, adjusted for unrealized items, which are considered not available for dividend declaration. Taking into account the Fund's cash flows, capital expenditure, investment objectives and financial condition, at least 10% of actual earnings or profits may be declared by the Board of Directors as dividends.

Dividends so declared will be automatically reinvested in additional shares on behalf of the shareholders, without sales charges, at the NAVPS on the payment date established for such dividends. As such, Shareholders realize their gains when shares are redeemed. Shareholders may also elect not to have dividends reinvested and receive payment in cash, net of tax.

Item 6. Management's Discussion and Analysis or Plan of Operation.

The Performance of the Fund could be measured by the following indicators:

1. **Increase/Decrease in Net Assets Value Per Share (NAVPS).** NAVPS is computed by dividing net assets (total assets less total liabilities) by the total number of shares issued and outstanding plus the total number of shares outstanding due to deposit for future subscriptions (DFFS) and for conversion to shares, if any, as of the end of the reporting day. Any increase or decrease in NAVPS translates to a prospective capital gain or capital loss, respectively, for the Fund's shareholders.
2. **Net Investment Income.** Represents the total earnings of the Fund from its investment securities, less operating expenses and income tax. This gauges how efficiently the Fund has utilized its resources in a given time period.
3. **Assets Under Management (AUM).** These are the assets under the Fund's disposal. This measures investor confidence (increase/decrease brought about by investor subscriptions/redemptions) as well as the growth of the Fund (increase/decrease brought about by its operational income and market valuation of its assets and liabilities).
4. **Cash Flow.** Determines whether the Fund was able to achieve the optimal level of liquidity by being able to meet all its scheduled payments, while maintaining at the same time the maximum investments level and minimum cash level.

Accounting Policies for Financial Assets at Fair Value through Profit and Loss

Financial Assets

Initial Recognition and Measurement

Financial assets and financial liabilities are recognized when the entity becomes a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognized on trade-date, the date on which the Fund commits to purchase or sell the asset.

At initial recognition, the Fund measures a financial asset or financial liability at its fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit or loss (FVTPL), transaction costs that are incremental and directly attributable to the acquisition or issue of the financial asset or financial liability. Transaction costs of financial assets and financial liabilities carried at FVTPL are expensed in profit or loss.

Classification and Subsequent Measurement

The Fund classifies its financial assets in the following measurement categories:

- FVTPL
- Amortized cost

Classification of financial assets will be driven by the entity's business model for managing the financial assets and the contractual cash flows of the financial assets.

A financial asset is to be measured at amortized cost if: a) the objective of the business model is to hold the financial asset for the collection of the contractual cash flows, and b) the contractual cash flows under the instrument represent solely payment of principal and interest (SPPI).

All other debt and equity instruments must be recognized at fair value.

All fair value movements on financial assets are taken through the statement of comprehensive income, except for equity investments that are not held for trading, which may be recorded in the statement of comprehensive income or in reserves (without subsequent recycling to profit or loss).

Debt instruments

Subsequent measurement of debt instruments depends on the Fund's business model for managing the asset and the cash flow characteristics of the asset. There are two measurement categories into which the group classifies its debt instruments:

- Amortized cost. Assets that are held for collection of contractual cash flows where those cash flows represent SPPI are measured at amortized cost. A gain or loss on a debt investment that is subsequently measured at amortized cost and is not part of a hedging relationship is recognized in profit or loss when the asset is derecognized or impaired. Interest income from these financial assets is included in finance income using the effective interest rate method.
- FVTPL. Assets that do not meet the criteria for amortized cost are measured at FVTPL. A gain or loss on a debt investment that is subsequently measured at FVTPL and is not part of a hedging relationship is recognized in profit or loss and presented net in the statement of comprehensive income within other gains/(losses) in the period in which it arises. Interest income from these financial assets is included in finance income.

Amortized cost and effective interest method

The effective interest method is a method of calculating the amortized cost of a financial asset and of allocating interest income over the relevant period.

For financial instruments, the effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) excluding expected credit losses (ECL), through the expected life of the debt instrument, or, where appropriate, a shorter period, to the gross carrying amount of the debt instrument on initial recognition.

Interest income is recognized using the effective interest method for debt instruments measured subsequently at amortized cost. For financial instruments other than POCI financial assets, interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired.

Equity instruments

The Fund subsequently measures all equity investments at FVTPL, except where the Fund's Management has elected, at initial recognition, to irrevocably designate an equity instrument at FVTOCI. The Fund's policy is to designate equity investments as FVTOCI when those investments are held for the purposes other than to generate investment returns. As at December 31, 2025 and 2024, the Company does not have financial assets classified as FVTOCI.

Changes in the fair value of financial assets measured at FVTPL are recognized in the statements of profit or loss. These changes are reported as either net realized gains (losses) or unrealized gains (losses) on investments, as appropriate..

FINANCIAL MARKETS REVIEW (2025)

INVESTMENT APPROACH

The Fund is designed mainly to generate long-term capital appreciation through investment in high-quality equities comprised of constituents in the PSEi. The Fund's primary mandate will be to track the performance of the benchmark PSEi, by investing exclusively in listed equities that are a part of the PSEi and in liquid fixed income securities. The fund ended the year with an equity exposure of 99.65%.

PERFORMANCE REVIEW

The Philippines Stock Exchange Index (PSEi) endured a volatile 2025, ending the year down by 7.29% to 6,052.92. Despite a robust easing cycle from the Bangko Sentral ng Pilipinas (BSP), the market was weighed down by disappointing GDP prints, index rebalancing, US President's Trump tariffs, and flood control scandal.

The year began with a sharp 10% drop in January, triggered by lower-than-expected Q4 2024 gross domestic product (GDP) and PSEi rebalancing (adding CBC and AREIT; removing WLCON and NIKL). Markets recovered slightly in February following a reserve requirement ratio (RRR) cut to 5% and easing inflation.

During the second quarter, market sentiment turned positive as global trade tensions brought about by Trump's tariffs eased and inflation cooled to 1.4%. Likewise, the BSP began its easing cycle with two 25-bps cuts. While Q1 GDP print of 5.4% missed estimates, private consumption and government spending remained resilient.

For the third quarter, the flood control corruption scandal spooked investors, leading to more foreign outflows. In response to economic uncertainty and a lowered GDP outlook, the BSP delivered two more 25-bps cuts.

For the final quarter, the index stabilized above 6,000 psychological level. While Q3 GDP slowed further to 4%, a final December rate cut brought the policy rate to 4.5% (totaling 125 bps for the year).

The Index Fund tracks the sector allocation of the PSEi. For the year, the Fund posted a decline of 5.53% y-o-y in its NAVPS to PHP0.8241/share.

OUTLOOK

We expect the PSEi to remain challenged as investors wait for the recovery of the country's GDP which was hampered by the flood control corruption scandal. Though market valuations look reasonable at 9x P/E, both consumer and business confidence must improve to see a meaningful recovery in the local bourse. Other factors to watch out for are foreign flows, trade tariffs, and geo-political uncertainties.

Benchmark	1.62%	-7.09%	-7.09%	-7.63%	-15.04%

- Benchmark data were based on available information as of extraction date.

Market Review and Outlook

- The Philippine Stock Exchange Index (PSEi) gained 0.51% in December to close at 6,052.92. For full year 2025, the local stock market declined by 7.29%.
- December inflation came in at 1.8%, higher than previous month but still below the 2-4% target range of the BSP. The BSP cut rates by 25 bps in December to support economic growth and as inflation may remain low in the coming months.
- The Peso hit an all-time low of P59.22:\$1 during the month, finishing among the weakest in the region for 2025.
- Foreign funds were again net sellers in December amounting to \$210 million, bringing foreign ownership to an all-time low of 18.7%.
- With the PSEi holding above 6,000 and local investors supporting the market, the local bourse may try to make a run to 6,400 level. However, the risk of lower economic growth due to lower public spending, coupled with low consumer and business sentiment may cap the market recovery.

Market Review and Outlook

- The Philippine Stock Exchange Index (PSEi) saw a volatile November. Buying towards the end of the month brought the index to 6,022.24, gaining 1.6% MoM.
- Third quarter GDP growth came in at 4%, significantly lower than both previous quarters and estimates. The GDP miss drove the PSEi to a new YTD low before recovering later in the month.
- Corporate earnings for 3Q were mostly in line with expectations. Consumer names were generally weaker in November as a handful of consumer companies reported weakening demand and margin pressure.
- Inflation remained benign, supporting further rate cuts by the Bangko Sentral ng Pilipinas (BSP). Likelihood of a rate cut in December increased after the disappointing GDP print. Despite this, the Peso appreciated slightly P58.64: \$1.
- The local bourse may trade between 5,800 to 6,100 in the short run as investors wait for developments on the flood control corruption controversy.

Market Review and Outlook

- The Philippine Stock Exchange Index (PSEi) went through another tough month as a host of negative catalysts affected the market. The index ended at 5,929.68, losing 0.40% during the month.
- October inflation remains benign at 1.7%, slightly lower than the 1.8% market expectation. Meanwhile, the Philippine peso continued to depreciate during October, hitting P59:\$1. Foreign investors were once again net sellers of \$100m for the month. Total YTD outflows now stand at \$774m.
- Political risk continued to weaken market sentiment as investigations into ghost projects under the DPWH remained slow. Despite several lawmakers implicated in the corruption probe amounting to billions of pesos of taxpayer's funds, nobody has been charged by the Department of Justice.
- Moving forward, third quarter corporate earnings and GDP print will be key catalysts for the local stock market. Lower-than-expected GDP could keep the index below 6,000 and test previous low of 5,700. So far, weighted 3Q corporate earnings among PSEi members grew by +12%, driven by International Container Terminal Services Inc (ICT), the largest index member. Stripping off ICT, earnings growth was at +5% with most of the companies reporting in-line earnings.

Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics), as applicable to audits of financial statements of public interest entities, together with the ethical requirements that are relevant to audits of the financial statements of public interest entities in the Philippines. Other Information

Management is responsible for the other information. The other information comprises the information included in the Securities and Exchange Commission (SEC) Form 17-A Annual Report submission to the SEC, which is prepared by the Management and submitted after the issuance of the audited financial statements with our auditor's report attached thereon.

The SEC Form 17-A is expected to be made available to us after the date of this auditor's report. Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. When we read the other information identified above which have not yet been received, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with PFRS Accounting Standards, and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audits.

The Company's investment objective is to generate long-term capital growth by tracking the performance of the Philippine Stock Exchange Index (PSEi). The investment policy is to invest primarily in common stocks that comprise the PSEi and in cash and/or money market instruments. The Company appointed Sun Life Asset Management Company, Inc. (SLAMCI), an investment management company incorporated in the Philippines and a wholly-owned subsidiary of Sun Life of Canada (Philippines), Inc. (SLOCPI), as its fund manager, adviser, administrator, distributor and transfer agent and provides management, distribution and all required operational services, as disclosed in Note 10.

The Company's registered office address and principal place of business is at the 2nd Floor, Sun Life Centre, 5th Avenue corner Rizal Drive, Bonifacio Global City, Taguig City.

The Company is considered a public company under Rule 3.1 of the Implementing Rules and Regulations of the Revised Securities Regulation Code (SRC), which, among others, defines a public corporation as any corporation with assets of at least P50,000,000 and having 200 or more shareholders, each of whom holds at least 100 shares of its equity securities.

As at December 31, 2025 and 2024, the Company has 58,494 and 58,345 shareholders, respectively, each holding at least 100 shares of the Company's common shares.

2. FINANCIAL REPORTING FRAMEWORK AND BASIS OF PREPARATION AND PRESENTATION

Statement of Compliance

The financial statements of the Company have been prepared in accordance with the Philippine Financial Reporting Standards (PFRS) Accounting Standards. PFRS Accounting Standards include all applicable PFRS, Philippine Accounting Standards (PAS) and interpretations of the Philippine Interpretations Committee (PIC), Standing Interpretations Committee (SIC) and International Financial Reporting Interpretations Committee (IFRIC) as approved by the Financial and Sustainability Reporting Standards Council (FSRSC) and the Board of Accountancy and adopted by the SEC.

Basis of Preparation and Presentation

The financial statements of the Company have been prepared on the historical cost basis, except for certain financial assets measured at fair value.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Functional and Presentation Currency

These financial statements are presented in Philippine peso, the currency of the primary economic environment in which the Company operates. All amounts are recorded to the nearest peso, except when otherwise indicated.

3. ADOPTION OF NEW AND REVISED ACCOUNTING STANDARDS

Adoption of Amended Accounting Standards Effective in 2025

In the current year, the Company has applied all amendments to PFRS Accounting Standards that are mandatorily effective for accounting periods beginning on or after January 1, 2025. Their adoption had no material impact on the disclosures or the amounts reported in these financial statements.

Amendments to PAS 21, The Effects of Changes in Foreign Exchange Rates — Lack of Exchangeability

The amendments clarify how an entity determines whether a currency is exchangeable in another currency and how it estimates the spot exchange rate when exchangeability is lacking. The amendments also introduce additional disclosure requirements relating to currencies that are not exchangeable.

The Company applied the amendments prospectively from January 1, 2025. The adoption of the amendments did not have a material impact on the Company's financial statements.

New and Revised Accounting Standards Effective after the Reporting Period Ended December 31, 2025

At the date of authorization of these financial statements, the Company has not applied the following PFRS Accounting Standards pronouncements that have been issued but are not yet effective:

Effective for annual period beginning or after January 1, 2026

- Amendments to PFRS 9, *Financial Instruments* and PFRS 7, *Financial Instruments: Disclosures - Classification and Measurement of Financial Instruments*
- Annual Improvements to PFRS Accounting Standards—Volume 11
- Amendments to PFRS 9, *Financial Instruments* and PFRS 7 *Financial Instruments: Disclosures - Contracts Referencing Nature-dependent Electricity*

Effective for annual period beginning or after January 1, 2027

- PFRS 17, *Insurance Contracts*
- Amendments to PFRS 17, *Insurance Contracts*
- Amendment to PFRS 17, *Insurance Contracts - Initial Application and PFRS 9, Financial Instruments - Comparative Information*
- PFRS 18, *Presentation and Disclosure in Financial Statements*
- PFRS 19, *Subsidiaries without Public Accountability: Disclosures*
- Amendments to PAS 21, *The Effects of Changes in Foreign Exchange Rates - Translation to Hyperinflationary Presentation Currency*

Deferred effectivity

- Amendments to PFRS 10, *Consolidated Financial Statements* and PAS 28, *Investments in Associates and Joint Ventures—Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

Management anticipates that the adoption of the new or revised PFRS Accounting Standards in future periods will not have a material impact on the financial statements in the period of their initial adoption.

PFRS 18, Presentation and Disclosures in Financial Statements

PFRS 18 replaces PAS 1, carrying forward many of the requirements in PAS 1 unchanged and complementing them with new requirements. In addition, some PAS 1 paragraphs have been moved to PAS 8 and PFRS 7. Furthermore, the FSRSC has made minor amendments to PAS 7 and PAS 33 Earnings per Share.

PFRS 18 introduces new requirements to:

- present specified categories and defined subtotals in the statement of profit or loss
- provide disclosures on management-defined performance measures (MPMs) in the notes to the financial statements
- improve aggregation and disaggregation.

An entity is required to apply PFRS 18 for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The amendments to PAS 7 and PAS 33, as well as the revised PAS 8 and PFRS 7, become effective when an entity applies PFRS 18. PFRS 18 requires retrospective application with specific transition provisions.

The Company is currently assessing the impact of adopting these standards on its financial statements.

4. MATERIAL ACCOUNTING POLICIES

Financial Assets

Initial Recognition and Measurement

Financial assets and financial liabilities are recognized when the entity becomes a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognized on trade-date, the date on which the Company commits to purchase or sell the asset.

At initial recognition, the Company measures a financial asset or financial liability at its fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit or loss (FVTPL), transaction costs that are incremental and directly attributable to the acquisition or issue of the financial asset or financial liability. Transaction costs of financial assets and financial liabilities carried at FVTPL are expensed in profit or loss.

Classification and Subsequent Measurement

The Company classifies its financial assets in the following measurement categories:

- FVTPL
- Amortized cost

Classification of financial assets will be driven by the entity's business model for managing the financial assets and the contractual cash flows of the financial assets.

A financial asset is to be measured at amortized cost if: a) the objective of the business model is to hold the financial asset for the collection of the contractual cash flows, and b) the contractual cash flows under the instrument represent solely payment of principal and interest (SPPI).

All other debt and equity instruments must be recognized at fair value.

All fair value movements on financial assets are taken through the statement of comprehensive income, except for equity investments that are not held for trading, which may be recorded in the statement of comprehensive income or in reserves (without subsequent recycling to profit or loss).

Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are two measurement categories into which the group classifies its debt instruments:

- Amortized cost. Assets that are held for collection of contractual cash flows where those cash flows represent SPPI are measured at amortized cost. A gain or loss on a debt investment that is subsequently measured at amortized cost and is not part of a hedging relationship is recognized in profit or loss when the asset is derecognized or impaired. Interest income from these financial assets is included in finance income using the effective interest rate method.
- FVTPL. Assets that do not meet the criteria for amortized cost are measured at FVTPL. A gain or loss on a debt investment that is subsequently measured at FVTPL and is not part of a hedging relationship is recognized in profit or loss and presented net in the statement of comprehensive income within other gains/(losses) in the period in which it arises. Interest income from these financial assets is included in finance income.

Amortized cost and effective interest method

The effective interest method is a method of calculating the amortized cost of a financial asset and of allocating interest income over the relevant period.

For financial instruments, the effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) excluding expected credit losses (ECL), through the expected life of the debt instrument, or, where appropriate, a shorter period, to the gross carrying amount of the debt instrument on initial recognition.

Interest income is recognized using the effective interest method for debt instruments measured subsequently at amortized cost. For financial instruments other than POCI financial assets, interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired.

Equity instruments

The Company subsequently measures all equity investments at FVTPL, except where the Company's Management has elected, at initial recognition, to irrevocably designate an equity instrument at FVTOCI. The Company's policy is to designate equity investments as FVTOCI when those investments are held for the purposes other than to generate investment returns. As at December 31, 2025 and 2024, the Company does not have financial assets classified as FVTOCI.

Changes in the fair value of financial assets measured at FVTPL are recognized in the statements of profit or loss. These changes are reported as either net realized gains (losses) or unrealized gains (losses) on investments, as appropriate.

Derecognition

The Company derecognizes a financial asset only when the contractual rights to the asset's cash flows expire or when the financial asset and substantially all the risks and rewards of ownership of the asset are transferred to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain/loss that had been recognized in OCI and accumulated in equity is recognized in profit or loss, with the exception of equity investment designated as measured at FVTOCI, where the cumulative gain/loss previously recognized in OCI is not subsequently reclassified to profit or loss, but is transferred to retained earnings.

Financial Liabilities and Equity Instruments

Financial liabilities

All financial liabilities are measured subsequently at amortized cost using the effective interest method.

Financial liabilities measured subsequently at amortized cost

Financial liabilities that are not (i) contingent consideration of an acquirer in a business combination, (ii) held-for-trading, or (iii) designated as at FVTPL, are measured subsequently at amortized cost using the effective interest method.

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortized cost of a financial liability.

The Company's financial liabilities classified under this category include accrued expenses and other payables, payable to fund manager and due to brokers.

Derecognition of financial liabilities

The Company derecognizes financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in profit or loss.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities. Equity instruments issued by the Company are recognized at the proceeds received, net of direct issue costs.

Share capital

Share capital consisting of ordinary shares is classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction from the proceeds, net of tax. Any excess of proceeds from issuance of shares over its par value is recognized as additional paid-in capital.

Deficit

Deficit represents accumulated loss attributable to equity holders of the Company after deducting dividends declared. Deficit may also include effect of changes in accounting policy as may be required by the standard's transitional provisions.

Repurchase, disposal and reissuance of share capital (treasury shares)

When share capital recognized as equity is repurchased, the amount of the consideration paid, which includes directly attributable cost, net of any tax effects, is recognized as a reduction from equity. Repurchased shares are classified as treasury shares and are presented in the reserve for own share account. When treasury shares are sold or reissued subsequently, the amount received is recognized as increase in equity, and the resulting surplus or deficit on the transaction is presented as additional paid-in capital.

Deposit for future stock subscriptions

Deposit for future stock subscriptions is recorded at historical cost. According to Financial Reporting Bulletin (FRB) No. 6 as issued by SEC, this is classified as equity when all of the following criteria are met:

- the unissued authorized capital stock of the entity is insufficient to cover the amount of shares indicated in the contract;
- there is Board of Directors' approval on the proposed increase in authorized capital stock (for which a deposit was received by the Company);
- there is stockholders' approval of said proposed increase; and
- the application for the approval of the proposed increase has been presented for filing or has been filed with the SEC.

Deposit for future stock subscription is classified as liability when the above criteria are not met.

Revenue Recognition

Revenue is measured based on the consideration to which the Company expects to be entitled in a contract with a customer and excludes amounts collected on behalf of third parties. The Company recognizes revenue when it transfers control of a product or service to a customer.

Dividend income

Dividend income from investments is recognized when the shareholders' rights to receive payments have been established, usually at ex-dividend rate, provided that it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably.

Interest income

Interest income is accrued on a time proportion basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount.

Realized gains or losses

Gains or losses arising on the disposal of investments are determined as the difference between the sales proceeds and the carrying amount of the investments and is recognized in profit or loss.

Fair value gains or losses

Gains or losses arising from changes in fair values of investments are disclosed under the policy on financial assets.

Other income

Other income is income generated outside the normal course of business and is recognized when it is probable that the economic benefits will flow to the Company, and it can be measured reliably.

Expense Recognition

Expenses are recognized in profit or loss when incurred.

Expenses in the statements of comprehensive income are presented using the function of expense method. Investment expenses are transaction costs incurred in the purchase and sale of investments. Operating expenses are costs attributable to the administrative and other business expenses of the Company including management fees and custodianship fees.

Fair Value

In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such basis.

In addition, for financial reporting purposes, fair value measurements are categorized into Levels 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

Related Party Transactions

Parties are considered related if one party has control, joint control, or significant influence over the other party in making financial and operating decisions.

An entity that is a post-employment benefit plan for the employees of the Company and the key management personnel of the Company are also considered to be related parties.

Taxation

Income tax expense represents the sum of the current tax, final tax and deferred tax expense.

Current tax

The current tax expense is based on taxable profit for the year. Taxable profit differs from net profit as reported in the statements of comprehensive income because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible.

The Company's current tax expense is calculated using 25% regular corporate income tax (RCIT) rate or 2% minimum corporate income tax (MCIT), whichever is higher.

In 2023, the Company's current tax expense is calculated using 25% RCIT rate or 1% MCIT rate in July 1, 2020 to June 30, 2023 and 25% RCIT rate or 2% MCIT rate, whichever is higher, effective July 1, 2023, respectively.

Final tax

Final tax expense represents final taxes withheld on interest income from cash and cash equivalents and fixed-income securities and final taxes withheld on proceeds from sale of listed equity securities.

Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liability is generally recognized for all taxable temporary differences. Deferred tax asset is generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax asset and liability are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax asset is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax asset and liability are offset when there is a legally enforceable right to offset current tax asset against current tax liability and these relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax asset and liability on a net basis.

Current and deferred taxes for the year

Current and deferred taxes are recognized in profit or loss, except when they relate to items that are recognized in OCI or directly in equity, in which case, the current and deferred taxes are also recognized in OCI or directly in equity, respectively.

Earnings (Loss) per Share

The Company computes its basic earnings (loss) per share by dividing profit or loss for the year attributable to ordinary equity holders of the Company by the weighted average number of ordinary shares outstanding during the period.

For the purpose of calculating diluted earnings (loss) per share, profit or loss for the year attributable to ordinary equity holders of the Company and the weighted average number of shares outstanding are adjusted for the effects of deposit for future share subscriptions which are dilutive potential ordinary shares.

Net Asset Value per Share (NAVPS)

The Company computes its NAVPS by dividing the total net asset value as at the end of the reporting period by the number of issued and outstanding shares and shares to be issued on deposit for future stock subscriptions.

5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Company's accounting policies, Management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on the historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Critical Judgments in Applying Accounting Policies

The following are the critical judgments, apart from those involving estimations, that Management has made in the process of applying the Company's accounting policies that have the most significant effect on the amounts recognized in the financial statements.

Business model assessment

Classification and measurement of financial assets depend on the results of the SPPI and the business model test. The Company determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective.

The Company measures its financial assets at amortized cost if the financial asset qualifies for both SPPI and business model test. The Company's business model is to hold the asset and to collect its cash flows which are SPPI. All other financial assets that do not meet the SPPI and business model test are measured at FVTPL.

As at December 31, 2025 and 2024, the Company's financial assets measured at FVTPL amounted to P7,053,026,999 and P9,089,311,551, respectively, as disclosed in Note 7.

Puttable shares designated as equity instruments

The Company's share capital met the specified criteria to be presented as equity. The Company designated its redeemable share capital as equity instruments since the Company's share capital met the criteria specified in PAS 32, Financial Instruments: Presentation, to be presented as equity.

A puttable financial instrument includes a contractual obligation for the issuer to repurchase or redeem that instrument for cash or another financial asset on exercise of the put. As an exception to the definition of a financial liability, an instrument that includes such an obligation is classified as an equity instrument if it has met all of the following features:

- a. it entitles the holder to a pro rata share of the entity's net assets in the event of the entity's liquidation. The entity's net assets are those assets that remain after deducting all other claims on its assets;
- b. it is in the class of instruments that is subordinate to all other classes of instruments;
- c. all financial instruments in the class of instruments that is subordinate to all other classes of instruments have identical features;
- d. apart from the contractual obligation for the issuer to repurchase or redeem the instrument for cash or another financial asset, the instrument does not include any contractual obligation to deliver cash or another financial asset to another entity, or to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the entity, and it is not a contract that will or may be settled in the entity's own equity instruments; and
- e. total expected cash flows attributable to the instrument over the life of the instrument are based substantially on the profit or loss, the change in the recognized net assets or the change in the fair value of the recognized and unrecognized net assets of the entity over the life of the instrument (excluding any effects of the instrument).

As at December 31, 2025 and 2024, the recognized amount of share capital representing puttable shares in the statements of financial position amounted to P39,999,992 as disclosed in Note 11.

Key Sources of Estimation Uncertainty

The following are the Company's key assumptions concerning the future and other key sources of estimation uncertainty at the end of each reporting period that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Deferred tax assets

The Company reviews the carrying amount at the end of each reporting period and reduces deferred tax asset to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. However, there is no assurance that the Company will generate sufficient taxable profit that will allow all or part of its deferred tax asset to be utilized.

Based on Management's expectation of the Company's future taxable income, the Company did not recognize the deferred tax asset as at December 31, 2025 and 2024, as disclosed in Note 17.

12. ADDITIONAL PAID-IN CAPITAL

Additional paid-in capital of P4,659,514,200, P4,440,486,862 and P4,349,712,356 as at December 31, 2025, 2024 and 2023, respectively, pertains to excess payments over par value from investors and from reissuance of treasury shares.

13. NET ASSET VALUE PER SHARE (NAVPS)

NAVPS is computed as follows:

	Note	2025	2024
Total equity		P7,077,273,419	P9,111,760,499
Outstanding shares	11	8,588,814,996	10,446,688,413

NAVPS is based on issued, outstanding and fully paid shares minus treasury shares plus deposits for future stock subscriptions classified as equity. The expected cash outflow on redemption of these shares is equivalent to computed NAVPS as at reporting period.

14. INTEREST INCOME

This account consists of interest income on the following:

	Note	2025	2024	2023
Cash in banks	6	P 121,624	P 137,904	P 146,102
Cash equivalents		-	276,555	1,637,167
		P 121,624	P 414,459	P1,783,269

The Company records interest income at its gross amount, with any applicable final withholding taxes recognized as income tax expense.

Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. The Company classifies an investment as cash equivalent if that investment has a maturity of three months or less from the date of acquisition.

Average interest rates of cash in banks and cash equivalents in 2025, 2024 and 2023 are as follows:

	Note	2025	2024	2023
Cash in banks	6	0.19%	0.14%	0.13%
Cash equivalents		-	5.51%	2.2%

15. EARNINGS (LOSS) PER SHARE

The calculation of the basic and diluted earnings (loss) per share is based on the following data:

	2025	2024	2023
Total comprehensive income (loss) for the year	(P477,701,229)	P 348,828,960	(P 35,701,457)
Weighted average number of shares:			
Issued and outstanding	3,997,417,525	3,973,960,153	3,844,229,555
Potential dilutive shares	5,767,265,233	7,502,344,236	9,679,086,012
Weighted average number of outstanding shares for the purpose of computing diluted earnings (loss) per share	9,764,682,758	11,476,304,389	13,523,315,567
Basic earnings (loss) per share	(P 0.120)	P 0.088	(P 0.009)
Diluted earnings (loss) per share	(P 0.049)	P 0.030	(P 0.003)

The DFFS as at December 31, 2025, 2024 and 2023 are dilutive, therefore, diluted earnings (loss) per share is lower than the basic earnings (loss) per share.

16. FAIR VALUE OF FINANCIAL INSTRUMENTS

Assets and liabilities measured at fair value on a recurring basis

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value classified under level 1 based on the degree to which the inputs to fair value are observable.

	Note	Level 1
December 31, 2025		
Investments in listed equity securities	7	P7,053,026,999
December 31, 2024		
Investments in listed equity securities	7	P9,089,311,551

Listed equity securities are valued at quoted prices readily available in the Philippine Stock Exchange as at reporting date. If no sale of such security is made on that date, bid prices will then be considered as the closing rate.

Financial assets and liabilities not measured at fair value

Cash in banks, dividends receivable, due to brokers, accrued expenses and other payables excluding withholding and documentary stamp taxes, and payable to fund manager have short-term maturities, hence, their carrying amounts are considered their fair values.

On March 26, 2021, the Republic Act (RA) 11534 also known as "Corporate Recovery and Tax Incentives for Enterprises Act" or "CREATE" Act was passed into law which

reduced the corporate income tax rates and rationalized the current fiscal incentives by making it time-bound, targeted and performance-based.

Among others, the Act includes the following significant revisions:

1. Effective July 1, 2020, domestic corporations with total assets not exceeding P100 million and net taxable income of P5 million and below shall be subject to 20% income tax rate while the other domestic corporations and resident foreign corporations will be subject to 25% tax income tax rate;

The tax rate used in the reconciliations above is the corporate tax rate of 25% in 2025, 2024 and 2023 payable by the Company.

Details of the Company's NOLCO are as follows:

Year of Incurrence	Year of Expiry	Beginning Balance	Addition		Expired	2025 Balance
2022	2025	P163,432,206	P	-	P163,432,206	P -
2023	2026	165,081,556		-	-	165,081,556
2024	2027	143,500,733		-	-	143,500,733

Details of the Company's NOLCO covered by Revenue Regulation (RR) No. 25-2020 is as follows:

Year of Incurrence	Year of Expiry	Beginning Balance	Addition		Expired	2025 Balance
2020	2025	P145,893,346	P	-	P145,893,346	P -
2021	2026	166,493,662		-	-	166,493,662
		P312,387,008	P	-	P145,893,346	P166,493,662

Pursuant to Section 4 COVID-19 Response and Recovery Interventions paragraph (bbbb) of Republic Act No. 11494 also known as "Bayanihan to Recover As One Act" and to RR No. 25-2021 of Bureau of Internal Revenue, the NOLCO incurred by the Company for taxable years 2020 and 2021 shall be carried over as a deduction from gross income for the next five consecutive taxable years immediately following the year of such loss.

Details of MCIT are as follows:

Year Incurred	Year of Expiry	Beginning Balance	Addition	Change in tax rate	Applied Current Year	Expired	Unapplied
2022	2025	P21	P -	P -	P -	(P 21)	P -
2023	2026	17	-	-	-	-	17
2024	2027	15	-	-	-	-	15
2025	2028	-	62	-	-	-	62
		P53	P62	P -	P -	(P 21)	P94

Deferred tax assets on NOLCO and MCIT were not recognized since Management believes that future taxable income will not be available against which the deferred tax asset can be utilized.

The Company's interest income arising from cash in banks, and realized gains on sale of listed equity securities are already subjected to final tax and are therefore excluded from the computation of taxable income subject to RCIT and MCIT.

18. FINANCIAL RISK MANAGEMENT

The Company's activities expose it to a variety of financial risks: market risk, which includes interest rate and equity price risks, credit risk and liquidity risk. The Fund Manager exerts best efforts to anticipate events that would negatively affect the value of the Company's assets and takes appropriate actions to counter these risks. However, there is no guarantee that the strategies will work as intended. The policies for managing specific risks are summarized below.

Market risk

The Company's activities expose it primarily to the financial risks of changes in interest rates and prices of equity securities in the stock market. There has been no change on the manner in which the Company manages and measures the risk.

Interest rate risk

Interest rate risk refers to the possibility that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest.

The primary source of the Company's interest rate risk relates to cash in banks. Interest rates of these financial assets are disclosed in Notes 6 and 14.

The risk is managed by the Fund Manager by actively monitoring the prevailing interest rate environment. The duration of the portfolio is reduced during periods of rising rates and widening credit spreads to maximize interest income potential. Conversely, the same is increased during periods of falling rates and narrowing credit spreads.

A 50 basis points increase or decrease in the interest rates had been determined for sensitivity analysis based on the exposure to interest rates for financial assets at FVTPL and loans and receivables at the end of each reporting period. The same is used for reporting interest rate risk internally to key management personnel and represents Management's assessment of the reasonable effect of the maximum possible movement in interest rates.

The following table details the increase or decrease in net profit after tax if interest rates had been 50 basis points higher or lower and all other variables are held constant for the years ended 2025, 2024 and 2023:

Change in Interest rates	Increase (Decrease) in Net Profit (Loss)		
	2025	2024	2023
+50 basis	P231,900	P269,259	P490,565
-50 basis	(231,900)	(269,259)	(490,565)

In Management's opinion, the sensitivity analysis is unrepresentative of the inherent interest rate risk because the exposure at the end of the reporting period does not reflect the exposure during the year.

Equity price risk

The Company is exposed to equity price risks arising from investments in listed equity securities. Investments in listed equity securities could either be held for strategic or trading purposes.

The risk is managed by the Fund Manager by actively monitoring the domestic equity market. Portfolios are traded based on a combination of regularly-carried out fundamental and technical analyses of stock prices.

Based on the exposure to equity price risks at the end of each reporting period, if equity prices had been 2% higher or lower, profit or loss for the years ended December 31, 2025, 2024 and 2023 would have increased or decreased by P140,270,601, P179,444,824, and P213,797,863, respectively.

Other than interest and equity price risks discussed above, there are no other market risks which significantly affect the Company's performance.

In Management's opinion, the sensitivity analysis is unrepresentative of the inherent equity price risk because the exposure at the end of the reporting period does not reflect the exposure during the year.

Credit risk

Credit risk refers to the possibility that the counterparty will default on its contractual obligations resulting in financial loss to the Company. The Company has adopted a policy of dealing only with creditworthy counterparties, as a means of mitigating the risk of financial loss from defaults, and transacts only with entities that are rated with equivalent of investment grade of "High" down to "Satisfactory". This information is supplied by independent rating agencies, when available. If the information is not available, the Company uses other publicly available financial information and its own trading records to rate its major counter-parties. The Company's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties.

The table below summarizes the current internal credit rating equivalence system of the Company.

Summary rating	S&P rating	Internal credit rating
High	AAA	AAA
High	AAA	AA- to AA+
High	AAA	A- to A+
High	AAA	BBB- to BBB+
Satisfactory	AA	BB- to B+
Acceptable	B	B- to B+
Low	CCC/C	CCC- to CCC+

The carrying amount of cash and cash equivalents, and dividends receivable are recorded in the financial statements represents the Company's maximum exposure to credit risk. The Company determined that the credit quality of cash in banks and dividends receivable as high grade and low credit risk investments based on the financial institutions being licensed, regulated banks with strong market reputations, and the related party's solid financial position and historical payment performance. Therefore, no ECL is recognized for these financial assets.

Liquidity risk

Liquidity risk arises when the Company encounters difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset.

The Company aims to maintain an appropriate level of liquidity which means having sufficient liquidity to be able to meet all obligations promptly under foreseeable adverse circumstances, while not having excessive liquidity.

The Company maintains at least ten percent of the fund in liquid/semi-liquid assets in the form of cash and cash equivalents, listed equity securities, dividends receivable, and other collective schemes wholly invested in liquid/semi-liquid assets to assure necessary liquidity. This is also in compliance to Section 6.10 of the Implementing Rules and Regulations of the Investment Company Act series of 2018.

The Fund Manager manages liquidity risk by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The following table details the Company's remaining contractual maturity for its non-derivative financial liabilities. The table had been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay.

	Less than One Month	One Month to One Year	Total
2025			
Accrued expenses and other payables	P15,496,517	P975,599	P16,472,116

The difference between the carrying amount of accrued expenses and other payables disclosed in the statements of financial position and the amount disclosed in this note pertains to withholding and documentary stamp taxes and filing and registration fees payable that are not considered financial liabilities.

The following table details the Company's expected maturity for its financial assets. The table had been drawn up based on the contractual maturities of the financial assets including interest that will be earned on those assets, except when the Company anticipates that the cash flows will occur in a different period.

	Average Effective Interest Rate	Less than One Year
2025		
Cash in banks	0.19%	P58,301,367

2024		
Cash in banks	0.14%	P68,193,014
Dividends receivable	-	4,029,580
		P72,222,594

The Company expects to meet its obligations from operating cash flows and proceeds of maturing financial assets and sale of financial assets at FVTPL.

NOTES TO FINANCIAL STATEMENTS

1. FINANCIAL REPORTING FRAMEWORK AND BASIS OF PREPARATION AND PRESENTATION

Statement of Compliance

These unaudited condensed consolidated interim financial statements of the Company as at and for the six-month period ended June 30, 2026 have been prepared in accordance with PAS 34, Interim Financial Reporting. These unaudited condensed consolidated interim financial statements do not include all the notes normally included in an annual audited financial report. Accordingly, these unaudited condensed consolidated interim financial statements are to be read in conjunction with the Annual Audited Financial Statements of the Company for the year ended December 31, 2025, which have been prepared in accordance with the Philippine Financial Reporting Standards (PFRS) Accounting Standards.

Basis of Preparation and Presentation

The financial statements of the Company have been prepared on the historical cost basis, except for certain financial assets measured at fair value.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Functional and Presentation Currency

These financial statements are presented in Philippine peso, the currency of the primary economic environment in which the Company operates. All amounts are recorded to the nearest peso, except when otherwise indicated.

2. ADOPTION OF NEW AND REVISED ACCOUNTING STANDARDS

Adoption of Amended Accounting Standards Effective in 2025

In the current year, the Company has applied all amendments to PFRS Accounting Standards that are mandatorily effective for accounting periods beginning on or after January 1, 2025. Their adoption had no material impact on the disclosures or the amounts reported in these financial statements.

Amendments to PAS 21, The Effects of Changes in Foreign Exchange Rates — Lack of Exchangeability

The amendments clarify how an entity determines whether a currency is exchangeable in another currency and how it estimates the spot exchange rate when exchangeability is lacking. The amendments also introduce additional disclosure requirements relating to currencies that are not exchangeable.

The Company applied the amendments prospectively from January 1, 2025. The adoption of the amendments did not have a material impact on the Company's financial statements.

New and Revised Accounting Standards Effective after the Reporting Period Ended December 31, 2025

At the date of authorization of these financial statements, the company has not applied the following PFRS Accounting Standards pronouncements that have been issued but are not yet effective:

Effective for annual period beginning or after January 1, 2026

- Amendments to PFRS 9, *Financial Instruments* and PFRS 7, *Financial Instruments: Disclosures - Classification and Measurement of Financial Instruments*
- Annual Improvements to PFRS Accounting Standards—Volume 11
- Amendments to PFRS 9, *Financial Instruments* and PFRS 7 *Financial Instruments: Disclosures - Contracts Referencing Nature-dependent Electricity*

Effective for annual period beginning or after January 1, 2027

- PFRS 17, *Insurance Contracts*
- Amendments to PFRS 17, *Insurance Contracts*
- Amendment to PFRS 17, *Insurance Contracts - Initial Application* and PFRS 9, *Financial Instruments – Comparative Information*
- PFRS 18, *Presentation and Disclosure in Financial Statements*
- PFRS 19, *Subsidiaries without Public Accountability: Disclosures*
- Amendments to PAS 21, *The Effects of Changes in Foreign Exchange Rates - Translation to Hyperinflationary Presentation Currency*

Deferred effectivity

- Amendments to PFRS 10, *Consolidated Financial Statements* and PAS 28, *Investments in Associates and Joint Ventures—Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

Management anticipates that the adoption of the new or revised PFRS Accounting Standards in future periods will not have a material impact on the financial statements in the period of their initial adoption.

PFRS 18, *Presentation and Disclosures in Financial Statements*

PFRS 18 replaces PAS 1, carrying forward many of the requirements in PAS 1 unchanged and complementing them with new requirements. In addition, some PAS 1 paragraphs have been moved to PAS 8 and PFRS 7. Furthermore, the FSRSC has made minor amendments to PAS 7 and PAS 33 Earnings per Share.

PFRS 18 introduces new requirements to:

- present specified categories and defined subtotals in the statement of profit or loss
- provide disclosures on management-defined performance measures (MPMs) in the notes to the financial statements
- improve aggregation and disaggregation.

An entity is required to apply PFRS 18 for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The amendments to PAS 7 and PAS 33, as well as the revised PAS 8 and PFRS 7, become effective when an entity applies PFRS 18. PFRS 18 requires retrospective application with specific transition provisions.

The Company is currently assessing the impact of adopting these standards on its financial statements.

3. MATERIAL ACCOUNTING POLICIES

Financial Assets

Initial Recognition and Measurement

Financial assets and financial liabilities are recognized when the entity becomes a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognized on trade-date, the date on which the Company commits to purchase or sell the asset.

At initial recognition, the Company measures a financial asset or financial liability at its fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit or loss (FVTPL), transaction costs that are incremental and directly attributable to the acquisition or issue of the financial asset or financial liability. Transaction costs of financial assets and financial liabilities carried at FVTPL are expensed in profit or loss.

Classification and Subsequent Measurement

The Company classifies its financial assets in the following measurement categories:

- FVTPL
- Amortized cost

Classification of financial assets will be driven by the entity's business model for managing the financial assets and the contractual cash flows of the financial assets.

A financial asset is to be measured at amortized cost if: a) the objective of the business model is to hold the financial asset for the collection of the contractual cash flows, and b) the contractual cash flows under the instrument represent solely payment of principal and interest (SPPI).

All other debt and equity instruments must be recognized at fair value.

All fair value movements on financial assets are taken through the statement of comprehensive income, except for equity investments that are not held for trading, which may be recorded in the statement of comprehensive income or in reserves (without subsequent recycling to profit or loss).

Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are two measurement categories into which the Company classifies its debt instruments:

- **Amortized cost.** Assets that are held for collection of contractual cash flows where those cash flows represent SPPI are measured at amortized cost. A gain or loss on a debt investment that is subsequently measured at amortized cost and is not part of a hedging relationship is recognized in profit or loss when the asset is derecognized or impaired. Interest income from these financial assets is included in finance income using the effective interest rate method.
- **FVTPL.** Assets that do not meet the criteria for amortized cost are measured at FVTPL. A gain or loss on a debt investment that is subsequently measured at FVTPL and is not part of a hedging relationship is recognized in profit or loss and presented net in the profit or loss statement within other gains/(losses) in the period in which it arises. Interest income from these financial assets is included in finance income.

Amortized cost and effective interest method

The effective interest method is a method of calculating the amortized cost of a financial asset and of allocating interest income over the relevant period.

For financial instruments other than purchased or originated credit-impaired (POCI) financial assets, the effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) excluding expected credit losses, through the expected life of the debt instrument, or, where appropriate, a shorter period, to the gross carrying amount of the debt instrument on initial recognition.

Interest income is recognized using the effective interest method for debt instruments measured subsequently at amortized cost. For financial instruments other than POCI financial assets, interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired.

Equity instruments

The Company subsequently measures all equity investments at FVTPL, except where the Company's Management has elected, at initial recognition, to irrevocably designate an equity instrument at FVTOCI. The Company's policy is to designate equity investments as FVTOCI when those investments are held for the purposes other than to generate investment returns. As at June 30, 2026 and 2025, the Company does not have financial assets classified as FVTOCI.

Changes in the fair value of financial assets measured at FVTPL are recognized in the statements of profit or loss. These changes are reported as either net realized gains (losses) or unrealized gains (losses) on investments, as appropriate.

Derecognition

The Company derecognizes a financial asset only when the contractual rights to the asset's cash flows expire or when the financial asset and substantially all the risks and rewards of ownership of the asset are transferred to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards

of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain/loss that had been recognized in OCI and accumulated in equity is recognized in profit or loss, with the exception of equity investment designated as measured at FVTOCI, where the cumulative gain/loss previously recognized in OCI is not subsequently reclassified to profit or loss, but is transferred to retained earnings.

Financial Liabilities and Equity Instruments

Financial Liabilities

All financial liabilities are measured subsequently at amortized cost using the effective interest method.

Financial liabilities measured subsequently at amortized cost

Financial liabilities that are not (i) contingent consideration of an acquirer in a business combination, (ii) held-for-trading, or (iii) designated as at FVTPL, are measured subsequently at amortized cost using the effective interest method.

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortized cost of a financial liability.

The Company's financial liabilities classified under this category include accrued expenses, due to brokers and other payables, payable to fund manager and due to brokers.

Derecognition of financial liabilities

The Company derecognizes financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in profit or loss.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities. Equity instruments issued by the Company are recognized at the proceeds received, net of direct issue costs.

Share capital

Share capital consisting of ordinary shares is classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction from the proceeds, net of tax. Any excess of proceeds from issuance of shares over its par value is recognized as additional paid-in capital.

Retained Earnings (Deficit)

Retained earnings (deficit) represents accumulated income (loss) attributable to equity holders of the Company after deducting dividends declared. Deficit may also include effect of changes in accounting policy as may be required by the standard's transitional provisions.

Repurchase, disposal and reissuance of share capital (treasury shares)

When share capital recognized as equity is repurchased, the amount of the consideration paid, which includes directly attributable cost, net of any tax effects, is recognized as a reduction from equity. Repurchased shares are classified as treasury shares and are presented in the reserve for own share account. When treasury shares are sold or reissued subsequently, the amount received is recognized as increase in equity, and the resulting surplus or deficit on the transaction is presented as additional paid-in capital.

Deposits for future stock subscriptions

Deposits for future stock subscriptions are recorded at historical cost. According to Financial Reporting Bulletin (FRB) No. 6 as issued by SEC, these are classified as equity when all of the following criteria are met:

- the unissued authorized capital stock of the entity is insufficient to cover the amount of shares indicated in the contract;
- there is Board of Directors' approval on the proposed increase in authorized capital stock (for which a deposit was received by the Company);
- there is stockholders' approval of said proposed increase; and
- the application for the approval of the proposed increase has been presented for filing of has been filed with the SEC.

Deposits for future stock subscriptions are classified as liability when the above criteria are not met.

Revenue Recognition

Revenue is measured based on the consideration to which the Company expects to be entitled in a contract with a customer and excludes amounts collected on behalf of third parties. The Company recognizes revenue when it transfers control of a product or service to a customer.

Dividend income

Dividend income from investments is recognized when the shareholders' rights to receive payments have been established, usually at ex-dividend rate, provided that it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably.

Interest income

Interest income is accrued on a time proportion basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount.

Realized gains or losses

Gains or losses arising on the disposal of investments are determined as the difference between the sales proceeds and the carrying amount of the investments and is recognized in profit or loss.

Fair value gains or losses

Gains or losses arising from changes in fair values of investments are disclosed under the policy on financial assets.

Other income

Other income is income generated outside the normal course of business and is recognized when it is probable that the economic benefits will flow to the Company and it can be measured reliably.

Expense Recognition

Expenses are recognized in profit or loss when incurred.

Expenses in the statements of comprehensive income are presented using the function of expense method. Investment expenses are transaction costs incurred in the purchase and sale of investments. Operating expenses are costs attributable to the administrative and other business expenses of the Company including management fees and custodianship fees.

Fair Value

In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such basis.

In addition, for financial reporting purposes, fair value measurements are categorized into Levels 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

Related Party Transactions

Parties are considered related if one party has control, joint control, or significant influence over the other party in making financial and operating decisions.

An entity that is a post-employment benefit plan for the employees of the Company and the key management personnel of the Company are also considered to be related parties.

Taxation

Income tax expense represents the sum of the current tax, final tax and deferred tax expense.

Current tax

The current tax expense is based on taxable profit for the year. Taxable profit differs from net profit as reported in the statements of comprehensive income because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible.

The Company's current tax expense is calculated using 25% regular corporate income tax (RCIT) rate or 2% minimum corporate income tax (MCIT), whichever is higher.

In 2023, the Company's current tax expense is calculated using 25% RCIT rate or 1% MCIT rate in July 1, 2020 to June 30, 2023 and 25% RCIT rate or 2% MCIT rate, whichever is higher, effective July 1, 2023, respectively.

Final tax

Final tax expense represents final taxes withheld on interest income from cash and cash equivalents and fixed-income securities and final taxes withheld on proceeds from sale of listed equity securities.

Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and these relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

Current and deferred taxes for the year

Current and deferred taxes are recognized in profit or loss, except when they relate to items that are recognized in OCI or directly in equity, in which case, the current and deferred taxes are also recognized in OCI or directly in equity, respectively.

Earnings (Loss) per Share

The Company computes its basic loss per share by dividing earnings (loss) for the year attributable to ordinary equity holders of the Company by the weighted average number of ordinary shares outstanding during the period.

For the purpose of calculating diluted earnings (loss) per share, profit or loss for the year attributable to ordinary equity holders of the Company and the weighted average number of shares outstanding are adjusted for the effects of deposits for future stock subscriptions which are dilutive potential ordinary shares.

Net Asset Value per Share (NAVPS)

The Company computes its NAVPS by dividing the total net asset value as at the end of the reporting period by the number of issued and outstanding shares and shares to be issued on deposits for future stock subscriptions.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The Performance of the Company could be measured by the following indicators:

- 1. Increase/Decrease in Net Assets Value Per Share (NAVPS).** NAVPS is computed by dividing net assets (total assets less total liabilities) by the total number of shares issued and outstanding plus the total number of shares outstanding due to deposit for future subscriptions (DFFS) and for conversion to shares, if any, as of the end of the reporting day. Any increase or decrease in NAVPS translates to a prospective capital gain or capital loss, respectively, for the Company's shareholders.
- 2. Net Investment Income.** Represents the total earnings of the Company from its investment securities, less operating expenses and income tax. This gauges how efficiently the Company has utilized its resources in a given time period.
- 3. Assets Under Management (AUM).** These are the assets under the Company's disposal. This measures investor confidence (increase/decrease brought about by investor subscriptions/redemptions) as well as the growth of the Company (increase/decrease brought about by its operational income and market valuation of its assets and liabilities).
- 4. Cash Flow.** Determines whether the Company was able to achieve the optimal level of liquidity by being able to meet all its scheduled payments, while maintaining at the same time the maximum investments level and minimum cash level.

PART II – RISK MANAGEMENT

Item 1. Financial Risk Exposures of the Company

1. Financial Risk Management Objectives and Policies

The Company's activities expose it to a variety of financial risks: Market risk, which includes fair value interest rate risk and equity price risk; credit risk; and liquidity risk. The Fund Manager exerts best efforts to anticipate events that would negatively affect the value of the Company's assets and takes appropriate actions to counter these risks. However, there is no guarantee that the strategies will work as intended. The policies for managing specific risks are summarized below:

- 1.1. Interest Rate Risk:** Interest Rate Risk is a type of Market Risk which is applicable to the Company's investments in bonds, if any. This refers to the increase/decrease of a bond price due to movement in market factors such as changes in interest rates. A change in interest rates is the period when interest rates rise or fall thus causing the decline or increase in the market price of the bonds held by the Company, if any. This risk is minimized by closely monitoring the direction of interest rates and aligning it with the appropriate strategy of the Company.
- 1.2 Credit Risk:** Investments in bonds carry the risk that the issuer of the bonds might default on its interest and principal payments. In the event of default, the Company's value will be adversely affected and may result in a write-off of the concerned asset held by the Company. To mitigate the risk, each Issuer/Borrower/Counterparty passes through a stringent credit process to determine whether its credit quality complies with the prescribed standards of the Company. Further, the credit quality of the Issuer/Borrower/Counterparty is reviewed periodically to ensure that excellent credit standing is maintained. Moreover, a 10% exposure limit to a single entity is likewise observed.
- 1.3 Liquidity Risk:** The Company is usually able to service redemptions of investors within seven (7) banking days after receipt of the notice of redemption by paying out redemptions from available cash or near cash assets in its portfolio. However, when redemptions exceed the Company's available cash or near cash assets in its portfolio, the Company will have to sell its other security holdings; and during periods of extreme market volatility, the Company may not be able to find a buyer for such assets. Consequently, the Company may not be able to generate sufficient cash from its sale of assets to meet the redemptions within the normal seven (7) banking day period. To mitigate this, the Company maintains adequate highly liquid assets in the form of cash, cash equivalents and near cash assets in its portfolio. As the Company's portfolio is composed of liquid assets, liquidity risk is deemed low.
- 1.4 Regulatory Risk:** The Company's investments and operations are subject to various regulations affecting among others, accounting of assets and taxation. These regulations occasionally change, and may result in lower returns or even losses borne by the investors. For example, a higher tax imposed on the sale or purchase of underlying assets of the Company may result in lower net asset value of the Company. To mitigate this risk, SLAMCI adopts global best practices. Further, it maintains regular communications with the relevant government agencies to keep itself abreast of the issues giving them concern, and to have the opportunity to help them set standards for good governance. SLAMCI also takes an active participation in the Philippine Investment Funds Association, Inc. ("PIFA"), an association of mutual fund companies in the Philippines.
- 1.5 Non-guarantee:** Unlike deposits made with banks, an investment in the Fund is neither insured nor guaranteed by the Philippine Deposit Insurance Corporation ("PDIC"). Hence, investors carry the risk of losing the value of their investment, without any guaranty in the form of insurance. Moreover, as with any investment, it is important to note that past performance of the Fund does not guarantee its future success.
- 1.6 Dilution Risk:** Being an open-end mutual fund, various investors may effectively subscribe to any amount of shares of the Company. As such, investors face the risk of their investments being diluted as more investors subscribe to shares of the Company. The influence that the investors can exert over the control and management of the Fund decreases proportionately.

- 1.7 Large Transaction Risk:** If an investor in a Company makes a large transaction, the Company's cash flow may be affected. For example, if an investor redeems a large number of shares of a Company, that Company may be forced to sell securities at unfavorable prices to pay for the proceeds of redemption. This unexpected sale may have a negative impact on the net asset value of the Company.
- 1.8 Fund Manager Risk:** The performance of the Company is also dependent on the Fund Manager's skills. Hence, the Company may underperform in the market and/or in comparison with similar funds due to investment decisions made by the Fund Manager, and may also fail to meet the Company's investment objectives. The Board of Directors of the Issuer, however, shall ensure that all investment policies and restrictions enumerated in this Prospectus are strictly followed.
- 1.9 Operational Risk:** This is the risk of loss resulting from inadequate or failed internal processes, controls, people and systems. Categories of operational risks may fall under: sales and distribution, human resources, information technology, processes and people, accounting and finance, model risk, legal and regulatory and third party relationships. The Company ensures that the internal controls and practices are consistent with enterprise wide policies supporting the management of operational risks. The Company has established business specific guidelines. Comprehensive investment program, including appropriate level of self-insurance, is maintained to provide protection against potential losses.
- 1.10 Index Risk:** The performance of the Fund may not precisely duplicate the performance of the benchmark index being used. The Company may rebalance the portfolio to account for changes in the composition or valuation of the stocks within the index. This creates the possibility of a marked difference between the Fund's performance and that of the index. Lacking active risk management, the Company is fully exposed to all of the changes to the market benchmark, the Philippine Stock Exchange Index (PSEi). Considering that this risk is inherent to the Fund, investors must be fully aware of it prior to investing.
- 1.11 Passive Management Risk:** The Company is a passively managed fund. Passively managed funds would not sell a security if the security's issuer was in financial trouble, unless the security is removed from the applicable index being replicated. The passively managed fund must continue to invest in the securities of the index, even if the index is performing poorly. That means the passively managed fund won't be able to reduce risk by diversifying its investments into securities listed on other indices. As a result, the performance of a passively managed fund may differ significantly from the performance of an actively managed fund.

2. Capital Risk Management

The Fund Manager manages the Company's capital to ensure that the Company will be able to continue as a going concern while maximizing returns to stakeholders through the optimization of the mix of high-quality debt and equity securities from domestic issuers.

The Company is guided by its Investment Policies and Legal Limitations. All the proceeds from the sale of shares, including the original subscription payments at the time of incorporation constituting the paid-in capital, is held by the pertinent custodian banks.

The capital structure of the Company consists of issued capital as disclosed in Note 9.

The Fund Manager manages the Company's capital and NAVPS, as disclosed in Notes 9 and 11 to ensure that the Company's net asset value remains competitive and appealing to prospective investors.

The Company is also governed by the following fundamental investment policies:

- a. It does not issue senior securities;
- b. It does not intend to incur any debt or borrowing. In the event that borrowing is necessary, it can do so only if, at the time of its incurrence or immediately thereafter, there is asset coverage of at least 300% for all its borrowings;
- c. It does not participate in any underwriting or selling group in connection with the public distribution of securities, except for its own share capital;
- d. It generally maintains a portfolio that mirrors the components of the PSEi.
- e. It does not invest more than twenty percent (20%) of its net assets in real estate properties and developments, subject to investment restrictions and/or limitations under applicable law, if any;
- f. It does not purchase or sell commodity futures contracts;

- g. The proportion of the Company's assets that shall be invested in each type of security shall be according to the percentage its market capitalization represents in the PSEi;
- h. Subscribers are required to settle their subscriptions in full upon submission of their application for subscriptions;
- i. It may use various techniques to hedge investment risks; and
- j. It does not change its investment objectives without the prior approval of a majority of its shareholders and prior notice to the SEC.

The Investment Policies refer to the following:

- a. Investment Objective – to generate long-term capital growth by tracking the performance of the Philippine Stock Exchange Index (PSEi). The investment policy is to invest primarily in common stocks that comprise the PSEi and in cash and/or money market instruments.
- b. Benchmark – 100% PSE Index
- c. Asset Allocation Range – the Company allocates its funds available for investments among cash and other deposit substitute, fixed-income securities and equity securities based on certain proportion as approved by Management.

Other matters covered in the investment policy include the fees due to be paid to the Fund Manager with management and distribution fees each set at an annual rate of 1% of the net assets attributable to shareholders on each valuation day.

In compliance with SEC Memorandum Circular No. 21, Series of 2019 signed on September 24, 2019 in relation to independent Net Asset Value (NAV) calculation, SLAMCI (Fund Manager) engaged Citibank, N.A. Philippines to service its fund accounting functions including calculation of its NAV every dealing day. In December 2020, SLAMCI implemented the outsourced fund accounting to all Sun Life Prosperity Funds.

As at June 30, 2026 and December 31, 2025, the Company is in compliance with the above requirements and minimum equity requirement of the SEC of P50,000,000.

3. The amount and description of the company's investment in foreign securities:

The Company does not have any investment in foreign securities.

4. Significant accounting judgments made in classifying a particular financial instrument in the fair value hierarchy.

CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Company's accounting policies, Management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on the historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Critical Judgments in Applying Accounting Policies

The following are the critical judgments, apart from those involving estimations, that Management has made in the process of applying the Company's accounting policies that have the most significant effect on the amounts recognized in the financial statements.

Business model assessment

Classification and measurement of financial assets depends on the results of the SPPI and the business model test. The Company determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective.

The Company measures its financial assets at amortized cost if the financial asset qualifies for both SPPI and business model test. The Company's business model is to hold the asset and to collect its cash flows which are SPPI. All other financial assets that do not meet the SPPI and business model test are measured at FVTPL.

Puttable shares designated as equity instruments

The Company's share capital met the specified criteria to be presented as equity. The Company designated its redeemable share capital as equity instruments since the Company's share capital met the criteria specified in PAS 32, Financial Instruments: Presentation, to be presented as equity.

A puttable financial instrument includes a contractual obligation for the issuer to repurchase or redeem that instrument for cash or another financial asset on exercise of the put. As an exception to the definition of a financial liability, an instrument that includes such an obligation is classified as an equity instrument if it has met all of the following features:

- a. it entitles the holder to a pro rata share of the entity's net assets in the event of the entity's liquidation. The entity's net assets are those assets that remain after deducting all other claims on its assets;
- b. it is in the class of instruments that is subordinate to all other classes of instruments;
- c. all financial instruments in the class of instruments that is subordinate to all other classes of instruments have identical features;
- d. apart from the contractual obligation for the issuer to repurchase or redeem the instrument for cash or another financial asset, the instrument does not include any contractual obligation to deliver cash or another financial asset to another entity, or to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the entity, and it is not a contract that will or may be settled in the entity's own equity instruments; and
- e. total expected cash flows attributable to the instrument over the life of the instrument are based substantially on the profit or loss, the change in the recognized net assets or the change in the fair value of the recognized and unrecognized net assets of the entity over the life of the instrument (excluding any effects of the instrument).

As at June 30, 2026 and December 31, 2025, the recognized amount of share capital representing puttable shares in the statements of financial position amounted to P39,999,992.

Key Sources of Estimation Uncertainty

The following are the Company's key assumptions concerning the future and other key sources of estimation uncertainty at the end of each reporting period that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Deferred tax assets

The Company reviews the carrying amount at the end of each reporting period and reduces deferred tax assets to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilized. However, there is no assurance that the Company will generate sufficient taxable profit that will allow all or part of its deferred tax assets to be utilized.

Based on Management's expectation of the Company's future taxable income, the Company did not recognize the deferred tax assets as at June 30, 2026 and December 31, 2025.

Compliance with Foreign Account Tax Compliance Act (FATCA)

In accordance with the requirements of the US Internal Revenue Service ("IRS") and the Intergovernmental Agreement ("IGA") between the Government of the United States of America and the Government of the Republic of the Philippines to Improve International Tax Compliance and to Implement FATCA which was signed last July 13, 2015, the Company has registered with the Internal Revenue Service (IRS) and has obtained its own Global Intermediary Identification Number ("GIIN") as a sponsored entity. Sun Life Asset Management Company, Inc. ("SLAMCI") continues to assume responsibilities for the Company's FATCA compliance as the Sponsoring Entity and has implemented FATCA onboarding processes and procedures as well as system enhancements to monitor its new and pre-existing account holders who are U.S. Persons and have U.S. Indicia.

The Company, together with its Sponsoring Entity, SLAMCI, is preparing to comply for FATCA reporting on the date which will be set by the Bureau of Internal Revenue as soon as the IGA has been ratified by the Senate.

Market Review and Outlook

- The Philippine Stock Exchange Index (PSEi) posted a gain in June, recovering from prior months of Iran war-driven weakness. The PSEi rose 4.7% for the month, closing at 6,037.17 on June 30.
- The dominant market driver for the month was the interim US-Iran peace deal, with oil prices posting their largest quarterly drop (>20%) in six years.
- May inflation (6.8%) coming-in below expectations (7.8%) also alleviated some macro concerns and helped the appetite for domestic equities.
- ICT continued to be an outsized driver of index performance, but notable was the GCash IPO (up to USD1.5bn raise) announcement towards the end of the month which helped GLO stage a late rally.
- The trajectory of the Strait of Hormuz reopening remains the primary market catalyst heading into July. With US-Iran technical talks progressing and Hormuz traffic gradually recovering, a sustained reopening could provide meaningful relief to oil prices, the Peso, and inflation expectations leading to continued PSEi strength. However, ongoing political uncertainties domestically may derail the recovery narrative and should continue to be tracked.

Market Review and Outlook

- The Philippine Stock Exchange Index (PSEi) saw a decline in May as the lack of a resolution to the Iran conflict caused persistent risk-off sentiment. The PSEi lost 1.1% for the month, with May 29 marking the month-low of 5,768.76.
- The Philippine peso was among the worst-performing Asian currencies in May, driven by the country's outsized vulnerability to elevated oil import costs stemming from the Iran war. The USDPHP rate breached the 61.50 level, with the peso touching 61.56 intra-month before a brief recovery.
- Inflation remained a critical concern with April CPI coming in at 7.2% year-on-year, the fastest pace in three years, ahead of consensus estimates.
- The 1Q26 earnings season delivered limited positive catalysts, with mixed bank results and persistent weakness in property. Across sectors, corporates continue to flag margin pressures as elevated input costs constrain earnings growth.
- We expect the market to remain range-bound in the near term, as investors await clearer directional triggers. We maintain a cautious stance, favoring defensive sectors such as utilities given the still-challenging earnings backdrop. On the external front, geopolitical developments, particularly the Iran conflict, remain a key swing factor for risk sentiment. While tensions have reinforced the current risk-off environment, any signs of de-escalation or a potential resolution could serve as a meaningful catalyst, supporting a recovery in global risk appetite and, by extension, Philippine equities. We remain tactically open to opportunities, particularly if domestic conditions improve or global risks ease.

Market Review and Outlook

- The Philippine Stock Exchange Index (PSEi) declined further in April as the ongoing Iran conflict remained unresolved. The PSEi fell 1.9% for the month and closed at 5,833.64.
- A ceasefire announcement between the U.S. and Iran triggered a relief rally that lifted the PSEi back above 6,000. However, the Strait of Hormuz remained closed and oil prices stayed elevated, prompting another sell-off that drove the index lower into month-end.
- April inflation jumped to 7.2% due to higher transport costs. BSP raised policy rate by 25 basis points to 4.5% during the month and signaled more hikes to anchor inflation expectations.
- The peso further depreciated to 61.5/US\$, which fueled more foreign fund outflows for the month.
- Corporate earnings season began failed to provide meaningful positive catalysts. Bank earnings were largely in line with expectations but noticeably increased provisions for non-performing loans, while the property sector continued to struggle as residential inventory remains elevated.
- Developments surrounding the reopening of the Strait of Hormuz remain the primary driver for market direction going forward. Trading range is expected to be 5,800 to 6,200 in the near term.
