NOTE: The information above is subject to the specific guidelines set by Sun Life and the actual provisions of the insurance policy contract. The policy owner must understand that the investment-linked insurance product, where this fund option is attached to, may be subject to investment risks which could affect the value of the policy. Peso Global Sustainability Growth Fund is denominated in Philippine Peso. The foreign currency position of the underlying funds (i.e. PHP vs. USD) is not hedged. Thus, the Fund is fully exposed to foreign currency risk arising from fluctuations in the foreign exchange rates, which could significantly affect the fund value as reflected in the Fund's Unit Price. Peso Global Sustainability Growth Fund is not a security or a deposit product.

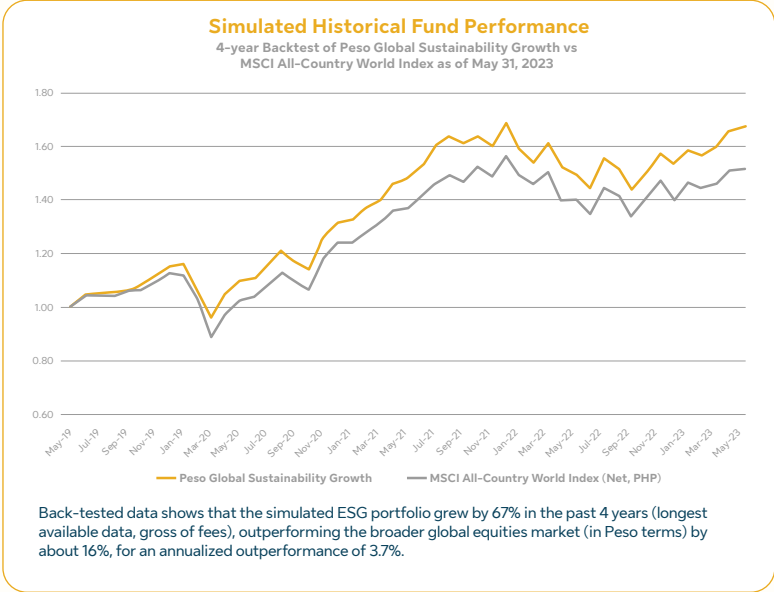

## How does the fund work?

Peso Global Sustainability Growth Fund is a fund-of-funds, where premiums collected in Philippine Pesos, less any charges, are converted to USD and invested in foreign currency-denominated and ESG-focused financial assets. These may include, but are not limited to, mutual funds and exchange-traded funds (ETFs), common stocks, and other equity-linked securities, such as preferred stock and convertible securities.

The Fund employs an **active management investment strategy** to flexibly add, remove and/or change the allocation of the underlying global assets from time to time, ensuring that the Fund provides the best possible returns.

NOTE: The simulated historical fund performance shown for the Peso Global Sustainability Growth Fund portfolio is hypothetical and based on the target allocation held over the specific period. Hypothetical performance does not represent actual performance of a portfolio and is not a guarantee of the expected future performance. Investments may decline in value. Underlying funds and allocations may vary over time. The historical returns illustrated do not consider applicable product fees (i.e. charges, taxes, etc.).
