The net proceeds from the sale of securities will be used to invest in a mix of Peso-denominated and foreign-currency denominated, high-quality debt (bonds) and equity securities from both local and foreign issuers. For a more detailed discussion, please refer to the section entitled "Use of Proceeds".

The shares are being offered in the Philippines through Sun Life Asset Management Company, Inc. ("SLAMCI"). As such, shareholders realize their gains when shares are redeemed. Shareholders may also elect not to have dividends reinvested and receive payment in cash, net of tax.

The Fund shall not participate in any underwriting or selling group in connection with the public distribution of securities, except for its own capital stock.

SUMMARY

The following summary is qualified in its entirety by the more detailed information appearing elsewhere in this Prospectus. Certain terms used herein are defined under "Glossary".

THE FUND

The Fund is a Philippine corporation registered as an open-end investment company under R. A. 2629 and R. A. 8799, on December 21, 1999 under SEC Registration No. A199908713. The Fund's investment objective is to provide moderate growth and a steady income stream through investments in high quality equity securities and high quality corporate and government debt securities.

Open-end mutual fund companies in the Philippines are organized as stock corporations. The Fund may become fully subscribed at any point in time. In such case, the Fund would continue to accept deposits for future subscription ("DFFS") in anticipation of an increase in capital, subject to the requirements of the law and regulations on the same. The DFFS accepted would be earmarked for the issuance of the appropriate number of shares that the DFFS would have purchased as of date of acceptance. Upon approval of the increase in authorized capital stock and upon registration of the new shares resulting therefrom with the SEC, the Fund would release the shares the DFFS had purchased, according to the "first in, first out" rule.

RISK DISCLOSURE STATEMENT

I. GENERAL WARNING

The price of securities can and does fluctuate, and any individual security may experience upward or downward movements, and may even become valueless. There is an inherent risk that losses may be incurred rather than profit made as a result of buying and selling securities.

Past performance is not a guide to future performance.

There is an extra risk of losing money when securities are bought from smaller companies. There may be a big difference between the buying price and the selling price of these securities.

An investor deals in a range of investments each of which may carry a different level of risk.

II. PRUDENCE REQUIRED

The risk of disclosure does not purport to disclose all the risk and other significant aspects of investing in these securities. An investor should undertake his own research and study on the trading of securities before commencing any trading activity. He may request information on the securities and issuer thereof from the Commission which are available to the public.

III. PROFESSIONAL ADVICE

The investor should seek professional advice if he is uncertain or has not understood any aspect of the securities or the nature of risks involved in trading of securities, especially high risk securities.

RISK FACTORS

The Fund Manager's overall risk management framework establishes policies, operating guidelines, risk tolerance limits and practices for risk management. Its risk management program is designed to:

- avoid risks that could materially affect the value of the Fund,
- contribute to sustainable earnings,
- take risks that the Fund can manage in order to increase returns, and
- provide transparency of the Fund's risks through internal and external reporting.

The Fund is in the business of accepting risks for appropriate return and takes on those risks that meet its investment objectives. The program design aligns risk management with the Fund's vision and strategy and embeds it within the business management practices of the business groups. In pursuing its investment objectives, the Fund Manager is responsible for ensuring that all significant risks are appropriately identified, assessed, managed, reported and monitored.

The Board of Directors of the Fund is ultimately responsible for ensuring that risk management policies and practices are in place. The Board has oversight role with respect to ensuring the identification of major areas of risk and development of strategies to manage those risks, and to review compliance with

risk management policies implemented by the Fund. The Fund's Risk Officer reports to the audit and compliance committee of the Board of Directors. Her duties and responsibilities include, among others:

- Monitoring the investments of the Fund to ensure that all identified gaps in management's risk and management processes are resolved on a timely basis;
- Provide leadership to facilitate management's understanding of the risk management framework, policies and processes;
- Ensuring that the Philippine risk management organization is appropriately staffed with individuals who have the requisite skills and competencies, and that the organization structure and reporting relationships are appropriate and sufficiently independent;
- Organizing and participating in the risk workshops of the annual risk identification process; ensuring that business units identify plausible risk scenarios;
- Ensuring that risk-based measurement and reporting metrics, including risk limits and exception reporting are established; assigning risk category to the final risk lists;
- Providing expertise in the development of action plans to address the risks identified;
- Reviewing and updating the risk report quarterly; identifying and escalating as appropriate any missed target dates for key risk action plans; and
- Providing documented quarterly status updates on key risks to the Audit and Compliance committee.

Key Risk Processes

The Fund has established a formal risk identification program whereby key risks that may impact its business are identified. Exposure to these risks is assessed on a qualitative and quantitative basis. Risk control programs and action plans are established for mitigating the exposure.

The Fund has adopted risk management policies to provide a consistent approach to measurement, mitigation and control, and monitoring of risk exposures.

Risk Categories

The Company's activities expose it to a variety of operational and financial risks such as market risk (which includes interest rate risk and equity price risk), credit risk, foreign exchange risk, fund manager risk, dilution risk, liquidity risk, large transaction risk, non-guarantee, regulatory risk, and operational risk.

Market Risk: Market risk is the risk of possible decline in the value of the Fund due to fluctuations in prices of the fund's assets. Since the Fund may invest in both equity and fixed income securities, it is subject to two types of market risks: (1) Interest Rate Risk applicable to fixed income investments of the Fund; and (2) Equity Price Risk applicable to the equity investments of the Fund.

Interest Rate Risk: Interest Rate Risk is a type of Market Risk which is applicable to the Fund's investments in bonds, if any. This refers to the increase/decrease of a bond price due to movement in market factors such as changes in interest rates. A change in interest rates is the period when interest rates rise or fall thus causing the decline or increase in the market price of the bonds held by the Fund, if any. This risk is minimized by closely monitoring the direction of interest rates and aligning it with the appropriate strategy of the Fund.

Equity Price Risk: For equity investments, changes in prices of equity refer to the equity investments held by the Fund either for strategic or trading purposes. These equity investments, if any, are subject to the daily price fluctuations, as determined by market forces. Hence, prices may vary as a result of the general economic and political conditions, as well as developments in the company's operations and overall profitability. To manage this risk, the equity investments included in the Fund's portfolio are carefully selected based on their fundamental soundness.

Credit Risk: Investments in bonds carry the risk that the issuer of the bonds might default on its interest and principal payments. In the event of default, the Fund's value will be adversely affected and may

result in a write-off of the concerned asset held by the Fund. To mitigate the risk, each Issuer/Borrower/Counterparty passes through a stringent credit process to determine whether its credit quality complies with the prescribed standards of the Fund. Further, the credit quality of the Issuer/Borrower/Counterparty is reviewed periodically to ensure that excellent credit standing is maintained.

Fund Manager Risk: The performance of the Funds is also dependent on the Fund Manager's skills. Hence, the Fund may underperform in the market and/or in comparison with similar funds due to investment decisions made by the Fund Manager, and may also fail to meet the Fund's investment objectives. The Board of Directors of the Fund, however, shall ensure that all investment policies and restrictions enumerated in this Prospectus are strictly followed.

Dilution Risk: Being an open-end mutual fund, various investors may effectively subscribe to any amount of shares of the Fund. As such, investors face the risk of their investments being diluted as more investors subscribe to shares of the Fund. The influence that the investors can exert over the control and management of the Fund decreases proportionately. To mitigate the risk, the Fund may impose single investor limits to the ownership of the fund, when necessary. This limits the extent to which any single investor can exercise control of the Fund. The Fund may also impose an anti-dilution levy or fee for significant orders, to protect the interest of the remaining investors of the Fund, when necessary.

Liquidity Risk: The Fund is usually able to service redemptions of investors within seven (7) banking days after receipt of the notice of redemption by paying out redemptions from available cash or cash equivalents. When redemptions exceed these liquid holdings, the Fund will have toless-liquid assets, and during periods of extreme market volatility, the Fund may not be able to find a buyer for such assets. As such, the Fund may not be able to generate sufficient cash from its sale of assets to meet the redemptions within the normal seven (7) banking day period. To mitigate this risk, the Fund maintains adequate highly liquid assets in the form of cash, cash equivalents and near cash assets in its portfolio. As the Fund's portfolio is composed of liquid assets, liquidity risk is deemed low.

Large Transaction Risk: If an investor in a Fund makes a large transaction, the Fund's cash flow may be affected. For example, if an investor redeems a large number of shares of a Fund, that Fund may be forced to sell securities at unfavorable prices to pay for the proceeds of redemption. This unexpected sale may have a negative impact on the net asset value of the Fund. To mitigate this risk, the Fund may impose single investor limits to the ownership of the fund, when necessary. This limits the extent to which redemptions from any single investor can impact the Fund's cash flow. The Fund may also impose an anti-dilution levy or fee for significant orders, to protect the interest of the remaining investors of the Fund, when necessary.

Non-guarantee: Unlike deposits made with banks, an investment in the Fund is neither insured nor guaranteed by the PDIC. Hence, investors carry the risk of losing the value of their investment, without any guaranty in the form of insurance. Moreover, as with any investment, it is important to note that past performance of the Fund does not guarantee its future success.

Regulatory Risk: The Fund's investments and operations are subject to various regulations affecting among others, accounting of assets and taxation. These regulations occasionally change, and may result in lower returns or even losses borne by the investors. For example, a higher tax imposed on the sale or purchase of underlying assets of the Fund may result in lower net asset value of the Fund. To mitigate this risk, SLAMCI adopts global best practices. Further, it maintains regular communications with the relevant government agencies to keep itself abreast of the issues giving them concern, and to have the opportunity to help them set standards for good governance. SLAMCI also takes an active participation in the Philippine Investment Funds Association, Inc. ("PIFA"), an association of mutual fund companies in the Philippines.

Operational Risk: This is the risk of loss resulting from inadequate or failed internal processes, controls, people and systems. Categories of operational risks may fall under: sales and distribution, human resources, information technology, processes and people, accounting and finance, model risk, legal and

regulatory and third party relationships. The Fund ensures that internal controls and practices are consistent with enterprise wide policies supporting the management of operational risks. The Fund has established business specific guidelines. Comprehensive investment program, including appropriate levels of self-insurance, is maintained to provide protection against potential losses.

The above risk factors are by no means exhaustive. New and/or unidentified risks may arise given the fast changing financial markets and economic environment.

CLASSIFICATION OF THE FUND INTO HIGH, MODERATE OR LOW RISK INVESTMENT; PROSPECTIVE INVESTORS

The investment objective of the Fund is to generate income in Philippine Pesos consistent with prudent management of the Fund's assets, the Fund's portfolio may consist of fixed income and other related securities of the Philippine Government, and commercial papers issued by corporations within the Philippines, certificates of deposits, and other short-term instruments. Considering the nature of these investments, the Fund is for retail and corporate clients and is classified as a balanced risk investment.

CONFLICT OF INTEREST POLICY

The Fund Manager and its employees are prohibited from engaging in fraudulent, deceptive or manipulative conduct. The interests of the Fund and its employees must never conflict with or appear to conflict with those of the Fund and its stakeholders. Where such a situation may arise, the Fund Manager will seek to ensure that all stakeholders are treated fairly, and that Fund Manager employees act in the best interests of each stakeholder.

The Fund Manager and its employees are required to take reasonable steps to identify and disclose existing material conflicts of interest as well as material conflicts of interest that would be expected to arise between the Fund Manager and the Fund. The Sun Life Prosperity Funds offer a unique "family of funds" to choose from. The "family of funds" concept allows investors to modify their investment strategies over time, by letting them transfer from one fund to another, as their needs dictate, as much as ten (10) times a year without paying any fees.

Competition

The Fund principally competes directly with the Unit Investment Trust Funds ("UITFs") offered by commercial banks, and other mutual funds in the Philippines in terms of returns and the associated risks of the return. The Fund's market strength is its wide distribution network that provides strategic distribution of Fund shares and the financial stability and reputation of its Investment Company Adviser, SLAMCI. The Fund intends to compete principally based on the reputation of SLAMCI for superior investment performance and corporate governance coupled with its distribution network and superior backroom operations.

The Fund participates in the mutual funds sector which is a sub-sector of the financial services industry. There are no national geographical boundaries as the nature of the industry and prevailing technology make it possible for the various players to offer their services to almost any place in the country.

Effect of Existing or Probable Governmental Regulations on The Business

Senate and congressional bills amending R. A. 2629, which is the main law that regulates the mutual fund industry, have been filed. The most prominent of these are the bills on the proposed Collective Investment Schemes Law ("CISL"). One of the noteworthy provisions of the CISL bills is the exemption of mutual fund companies from certain requirements of the Corporation Code as regards increasing ACS. If passed into law, this would be of possible benefit to the mutual fund companies which, with their numerous stockholders, find it difficult to obtain the votes of stockholders representing at least 2/3 of the outstanding capital stock to approve certain corporate actions. SLAMCI, through PIFA, participates in the hearing and deliberation of the CISL bill. SLAMCI expects the regulatory environment to improve with the passage of the CISL bill to the benefit of investors.

Employees

The Fund does not employ personnel. Day-to-day operations are carried out by SLAMCI pursuant to the terms and conditions of the Management Agreement and Distribution Agreement between the Fund and SLAMCI.

Shareholder's Privileges

Certain privileges granting reduced sales charge and waivers may be extended by SLAMCI to qualified investors who will apply for them.

The investor must notify SLAMCI at the time of transaction about his qualification and intention to avail and apply for specific privileges. Failure to notify SLAMCI ahead of time about his eligibility and intention to avail will allow SLAMCI to process the transaction subject to normal sales load charges.

SLAMCI reserves the right to approve or deny a shareholder's application for certain privileges according to the criteria it has set. These privileges may be revised or discontinued by SLAMCI at any time.

1. Waiver of Front End Sales Load (Option A) for qualified investors

Front-end zero load may be granted by SLAMCI to former participants in a benefit or retirement plan, who will convert his mutual fund retirement benefit and contribution into an individual, joint or ITF account with Sun Life Prosperity Funds. The same benefit may also be granted to participants of a retirement plan with at least 100 members and PHP5 Million or dollar equivalent in total asset value or any other requirements or qualifications that may be established by SLAMCI.

2. Free 10% Back End Redemption

An investor may be entitled to redeem up to 10% of his total shares under Back End without the application of a redemption fee or DSC subject to certain conditions as established by SLAMCI. An investor's free redemption entitlement shall be based on the total number of shares owned under Option B as of December 31 of the prior calendar year. This privilege may be extended only to partial redemptions and is not applicable to full redemptions of back-end investments. Redemption in excess of the allowed 10% will be subject to normal DSC.

This one-time privilege per year is not automatic and should be exercised by the investor. Free redemption entitlement is not cumulative. Unexercised entitlement cannot be carried forward to future redemptions within the same year or succeeding calendar years.

If redeemed after five (5) years, the investment shall no longer be subject to any redemption fee.

3. Reduced Sales Charge Plan

Combination Privilege

Investors may qualify for a reduced sales load by combining subscriptions to one or more of the Sun Life Prosperity Funds, under the following conditions:

2. The total subscription of the investor is at least PHP100,000.00 or its dollar equivalent, and this can be obtained by adding:

- The current subscription made by the investor and member/s of the immediate family; and

3. "Member of the immediate family" is defined as:

- Spouse
- Child
- Grandchild

4. The following accounts are not included for purposes of determining whether an investor qualifies under this privilege:

- Shares held by Corporations or business establishments of the investors.

This privilege is not automatic and should be exercised by the investor. Investors should provide all necessary information AT THE TIME OF PURCHASE regarding accounts eligible to be combined under this plan. Otherwise, SLAMCI will not retroact the privilege. SLAMCI reserves the right to revise or discontinue this privilege at any time.

Letter of Intent

A reduced sales load privilege may be granted if an investor has not yet accumulated PHP 5 Million or dollar equivalent worth of investment under his personal or qualified related accounts. An investor may avail of the lowest Option A sales load to all his investments within 12 calendar months, provided that he submits a Letter of Intent (LOI).

When an investor signs the LOI, SLAMCI agrees to charge the investor a reduced sales charge. The LOI does not obligate the investor to purchase additional shares. However, upon failure to comply with the LOI at the end of the 12-month period, SLAMCI will redeem enough shares equivalent to the additional sales charge to reflect the recalculated amount reflecting the actual purchase level.

SLAMCI will notify the client under this program at least one (1) month prior to the expiration of the LOI. SLAMCI reserves the right to revise or discontinue this privilege at any time.

Dividends

The Fund has not declared cash or stock dividends to date, but it has no restrictions that may limit its ability to pay dividends in the future.

The Board of Directors of the Fund has the power to fix and determine the amount to be reserved or provided for declaration and payment of dividends from the Fund's unrestricted retained earnings. The amount of such dividends (either in cash, stock, property or a combination of the foregoing) will depend on the Fund's profits, cash flows, capital expenditure, financial condition, and other factors and will follow SEC's guidelines on determining retained earnings available for dividend declaration. The existence of surplus profit is a condition precedent before a dividend can be declared. The surplus profits or income must be a bona fide income founded upon actual earnings or profits. Actual earnings or profits shall be the net income for the year based on the audited financial statements, adjusted for unrealized items, which are considered not available for dividend declaration. Taking into account the Fund's cash flows, capital expenditure, investment objective and financial condition, at least 10% of the actual earnings or profits may be declared by the Board of Directors as dividends.

Cash dividends and property dividends may be declared by the Board of Directors and no stockholder approval is required. Stock dividends paid on the Offer Shares are subject to approval by both the Board of Directors and the stockholders representing at least two-thirds (2/3) of the outstanding capital stock of the Fund at a stockholders' meeting called for such purpose.

Dividends so declared will be automatically reinvested in additional shares on behalf of the shareholders, without sales charges, at the NAVPS on the payment date established for such dividends. As such, shareholders realize their gains when shares are redeemed. Shareholders may elect not to have dividends reinvested and receive payment in cash, net of tax.

Top 5 Key Performance Indicators

The performance of a fund is important to its investors. Oftentimes, it is used when making investment decisions. That is why Key Performance Indicators (KPI), a set of quantifiable measures, is necessary to gauge its performance in terms of meeting the Fund's investment objective while consistently following its investment policy. The following are the top 5 KPIs related to the Fund:

1. **Total Return.** The performance of a mutual fund is always expressed in terms of its total return, which is the sum of the change in a fund's net asset value (NAV), its dividends and its capital gains distributions over a given period of time, net of its expenses.
2. **Market Conditions.** A fund's true performance potential needs to be evaluated within the context of the market environment prevailing during the different periods used.

It is most relevant to investors to measure the performance of a fund within a 5-year time frame as it will most likely cover a mix of market conditions that may be translated into a more reliable long-term indicator of the fund manager's investment management abilities.

3. **Benchmarks.** Benchmarking is one of the most important aspects of a mutual fund's total return performance. a fund's performance metrics only have meaning if they are compared to appropriate "guideposts," or benchmarks.

As for the Fund, considering that it is invested in high-quality debt instruments issued by the Republic of the Philippines and prime Philippine companies, its performance is measured against 50% of the Philippine Stock Exchange Index (PSEi) + 45% Bloomberg Philippine Sovereign Bond Index 1 to 5 Years (BPHIL15 Index) + 5% 30-day Special Savings Account (SSA).

The PSEi is the main index of the PSE and is the most watched index among the six PSEi Series. It measures the relative changes in the free float-adjusted market capitalization of the 30 largest and most active common stocks listed at the PSE, thereby providing an overview of the market's overall condition.

The BPHIL15 Index was identified as a replicable benchmark that appropriately reflects the investor risk profile of the Sun Life of Canada Prosperity Balanced Fund.

The following table shows how the Fund performed vis-à-vis the PSEi and the BPHIL15 Index.

Total Return

	Benchmark: 50% PSEi + 45% BPHIL15 Index + 30-day SSA	Sun Life of Canada Prosperity Balanced Fund
YTD Return	7.32%	6.92%
1-Year Return	9.99%	10.58%
3-Year Return	5.80%	2.34%
5-Year Return	17.96%	8.63%

*As of June 28, 2019

The benchmark may be changed by the Fund's Board of Directors from time to time.

4. **Peer Comparisons.** Mutual funds are also compared to their peers, or peer groups, and relevant fund categories. For example, it is common for investment research materials to compare a bond fund, like the Fund, to funds similar in nature (peers or peer group). While this information is made available to the Fund's investors, the same may be found in the website of the PIFA at www.pifa.com.ph.
5. **Asset Size.** Open-ended mutual funds grow their asset size in two ways:
 - i. Increase in the value of the underlying assets as a result of the strong performance of equity securities and/or bonds in the fund's portfolio. When the underlying assets in a portfolio increase in value, the fund's asset size increases.
 - ii. The inflow of investors' money. This is why a fund's asset size will continue to grow even if it has a negative return.

The increase in a fund's asset size signifies solid fund management skills which, combined with favorable market conditions backed by a strong economic outlook, illustrates how effectively a fund manager has performed and the extent to which value has been added through active management.

The second indicates investor confidence in the fund manager, the Fund, or both.

Most analysts check whether the performance of a mutual fund is attributable to personnel who have since left the fund. While there is no magic number when it comes to fund manager tenure, it should provide some investor comfort to know that with respect to the Fund, the Fund Manager and the Fund's top management have been with the Fund for at least five (5) years. Furthermore, SLOCPI having been in the business for decades combined with a record of consistent strong performance indicates a stability and resilience capable of withstanding the different stages of the business cycle.
